## 1990 MARKET REVIEW: Change is the Only Constant

Retired numismatists in the early 21st century will be certain to roll their eyes if anyone mentions the year "1990". The lucky ones will have mostly forgotten; the unlucky will remember only too vividly. The year started well enough, with many coins lingering near their all-time highs. There was a feeling of prosperity in the air. Wall Street money by the armored car-full was just around the corner. And there was no doubt that this time the market had been 'done' right, and wouldn't follow the pattern of every previous cycle known to numismatics. Our CCDN Coin Market Index, set at 1000 points with the first Bluesheet issue of 1990, had climbed to 1065 by March. A 6.5% average return over one-quarter; not a bad return on a "safe-investment" that combined the best of the collectible and investment worlds.

So what happened? Well, there are as many explanations as there are numismatists, and some reflect a lot more heat than light. At the risk of sounding critical, we might point out that the same drive and expertise that makes a successful coin dealer can also mean a narrowed focus that prevents some of the larger national or international issues from being followed as closely as they should be. Many numismatists tried to micro-explain what happened to the coin market by fastening upon one minor aspect or another. To have spent so much time in introspection meant that they missed the liquidity crunches that were also facing real estate, the stock market, and fine art – and not just in America.

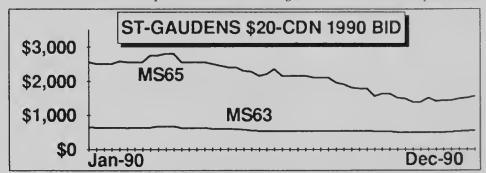

The answers (and there are many) to the liquidity crisis that consumed the attention of coin dealers during most of 1990 can best be explained by concentrating on those dealers that were hurt the least—the dealers who had made an effort over the years to cultivate a strong customer/collector/client base. The investors who panicked and fled at the first sign of a major downturn showed no loyalty to their dealers; the collectors took advantage of the lowered levels to make astute purchases from their dealers. And the difference in customers made all the difference in cash flow, inventory levels, and the ability to maneuver in a tricky market.

The question that most dealers were trying to answer was deceptively simple: "Where did the customers go?" One group of dealers blamed the disappearance of customers on the consent decree negotiated between the FTC and PCGS; while the decree itself was not damaging, the accompanying articles in the national financial press certainly didn't help Wall Street's interest in the coin market. Other dealers blamed the FTC's closure of several coin-oriented operations. Some even pointed fingers at the court battle between ATC and ANE. Still others favored 'shooting' any and all 'messengers' who printed declining Bids. A few even noticed that every month's population reports showed increasing numbers of 'rare' coins.

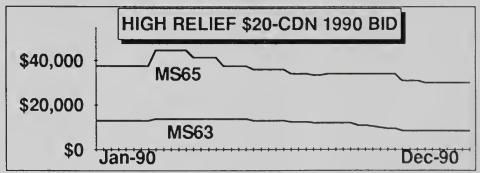

The lessened interest of Wall Street funds in coins certainly slowed the flow of new money into the marketplace—and in a market that has been liquidating itself for some time, the blow was sorely felt. But the loss (or lessening) of this type of investor still doesn't fully explain the apparent loss of lesser investors and collectors. At least one major dealer contemptuously dismissed the concept that the answer could be as simple as the customer's belief that coins were 'overpriced'. Still, since most coins are purchased with discretionary income, one has to look seriously at both competing activities for those surplus dollars and the general level of economic confidence. Dealers who were listening to their customers were increasingly hearing that the nicest material 'just wasn't worth the price tag'. It was only after this reticence to buy turned into reluctance and then into refusal that dealers 'suddenly' realized they had a serious problem on their hands.

Why suddenly? Perhaps it has a lot to do with the way the current market is structured. Pricing during 1990, to an unprecedented degree, was established by 'the tail wagging the dog'. Traditionally, one thinks of the value of a coin resulting from the aggregate of demand from dealers and customers for that particular item. But what happens when the highest levels of demand are being established in advance of where the strength of the market is willing to go? When such a market for the ultra-high condition coins is established, is it possible that they just might 'outpace' the underlying market? When cash flow problems caught up with enough of the players and the "tail" demand stopped 'wagging', some players were suddenly finding themselves holding coins of incredible rarity and quality that couldn't be sold at one-half of the purchase price of just a few months earlier. We know of one dealer who, early in 1990, purchased a Proof \$5 at over \$100,000, and turned down a quick \$5,000 profit; the coin is Bidding today below \$50,000. That dealer blames 'the market price discovery mechanisms' for his loss, although one could also look at the 2 additional coins in the population reports.

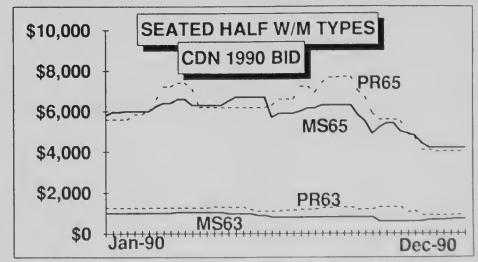

We looked at a few selected issues during 1990, evaluating CDN Bid levels. Gold proved to be a problem for more than a few dealers, who kept expecting bullion to rise and add real strength to the rarer Gold levels. While the threat of thermonuclear war was at its lowest level in several decades, it was certainly a time of international tension—tension that is continuing into 1991. The bullion markets never took off, and only some of that can be explained by dumping of Iraqi or Russian gold. Gold bullion started 1990 at about \$401 per ounce, and is lurking at the \$390 level as the year closes.

St-Gaudens Double Eagles in MS63 displayed little of the volatility that characterized the bulk of the 1990 coin market. This issue, one of the most generic of the rare coins, started the year at \$650 and ended at \$550, with lows and highs of \$500 and \$675 along the way. MS65 Saints, arguably a much rarer coin, also displayed much greater volatility. MS65s started the year at \$2550 and ended at \$1,550, with highs and lows of \$2,800 and \$1,375 respectively. Buyers who were waiting for the market to bottom to get the maximum coin for their money had a long wait during the year.

The High Relief \$20 in MS65 is arguably one of the most desirable of the rarer coins which are readily available for purchase. The gem started 1990 at \$37,500 and climbed to \$44,750 before joining the market slide, only to end the year at \$30,000. Its MS63 counterpart, certainly more available, saw its opening Bid of \$13,000 climb to only \$13,750 before sliding to \$8,600; although here, the key word is slide—the decline was slow and steady, allowing investors ample opportunity to 'get out' if they believed that the decline would continue.

How did the Liberty Seated With-Motto Half-Dollar perform? While the most notable feature would seem to be the close tracing of the MS65 and Proof65 Bids, the Pr65 actually peaked in the autumn rally, long after the rest of the market had suffered substantial declines. Some things never change in numeromatic investing picking the right issue, buying at the right time and price, and selling at the right time and price. Seated Halves in MS65 started at \$5,800, peaked at \$6,700, and ended at \$4,200. Proof65 started at \$5,600, peaked at \$7,700, only to end at \$4,000.

The MONTHLY SUMMARY and Complete Series Pricing Guide reports on those areas which are less volatile. The weekly COIN DEALER New (Greysheer) Reports the national. Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins seen. The coins may be certified or "Raw" [uncertified], but the grading MUST ADHERE to the current leading standard. Bids reported also centrivity in the certified SIGHT-UNSEEN market, such bids may include consideration of all cost attendant to certification for a particular solids for a "Raw" coins may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids flix may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate ealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which it Bid/Ask levels. INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor you may buy and sell coins through a dealer for a fee.

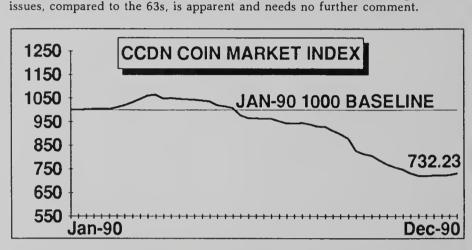

Subscription Information: The Monthly Summary and Complete Series Pricing Guide is mailed each month to subscribers of the weekly Coin Dealer Newsletter at no extra charge! The Monthly Summary is not a recap of the weekly CDN; it's a supplement.

A Subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years.

Address all subscription applications to:

The Barber Type Dimes in 65 (MS & PR) traced parallel paths during the year, 1990 MARKET REVIEW: Change is the Only Constant with both of them rising nicely during the early spring and autumn rallies. Still, both ended the year at about a third off of their starting point. The MS65 started 1990 at \$2,100, showed two peaks of \$2,950 and \$3,000, only to end at \$1500. Numismatists can get into a pretty healthy debate about the relative rarity and investment potential of the Barber coins—all denominations. The volatility of the 65 (Continued from Page One)

Overall, how did the market do in 1990? The CCDn Coin Market Index M, introduced to Bluesheet readers in September, is a compendium of the nineteen charts that make up the current monthly Bluesheet cycle. The CCDn CMI delivers a market overview supported by the sight-unseen Bidding actions on more than 13,000 underlying coins. Each of the charts in the Index is weighted equally; that is, the overall index number is derived by taking the average of the nineteen individual index numbers (each of which in turn take into account every coin and every grade appearing in the nineteen charts). The Index confirms what every dealer already knows-1990 has been one tough year. By definition, each of the 19 chart Indexes was set to equal 1000 points (as 100%) at the beginning of 1990. The year ended with the overall average at 732.23, with the individual charts ranging from 536.08 for PL dollars to 896.92 for the Better Date issues covered (including such items as the 1909-S VDB Lincoln Cent, the 1911-D \$2 1/2, and the 1932-D Washington

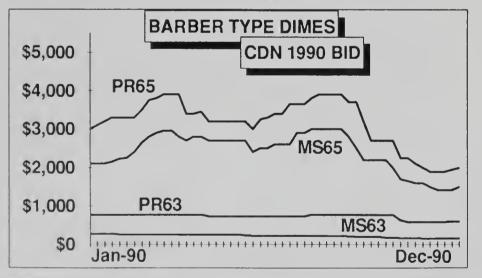

One of the bright lights of the 1990 market remained auctions, which have been assuming an increasingly important role in the market over the last decade. Starting with Mid-America's Fun Auction in early January, 1990 was a year for breaking records. Superior reported the sale of the King of Siam set for \$3.19 million in late May. The ever-popular Auction'90 reported prices realized exceeding \$25 million. Bowers and Merena's Schenkel auction provided one of the highlights of the year when the 1886-O wonder-coin (NGC-67, DPL) realized \$231,000. The only cloud on the auction horizon was the growing number of buy-backs (throughout the year)

as prices were falling but consignors wouldn't let their coins sell at the lower levels It doesn't reduce the financial or emotional strain facing dealers to remind you that coins are only following the same pricing cycle they have followed many times before, and will almost certainly follow again. We sympathize most with those dealers who maintained a large inventory to provide their customers with a selection from which to choose. Hopefully, the loyalty of their customers will allow them to still compete against dealers who were hurt less but have little retail traffic upon which to rebuild.

While it is difficult to pick a coin that is 'representative' of the Commemorative series, we thought to look at the Panama-Pacific Silver Half-Dollar and Gold Dollar. The MS65 Gold Dollar started 1990 at \$5,000, displayed the expected March '90 peak at \$5,600, but showed relative stability at several lowered levels thereafter; the sharp decline at year's end to \$3,500 was a symptom of the withdrawal of support by the market makers who had kept the Bid relatively stable for most of the year. The MS65 Half started the year Bid at \$3,900, peaked at \$4,300, and ended at \$2,800.

The MS63 Gold Dollar peaked in autumn (also after so much of the rest of the market had plunged), only to drop rather rapidly itself. The MS63 Half started at its yearly high of \$850, then declined to the \$525 level.

## Market Sense & Experience: A Specialist's View

by Bruce Lorich

"The easiest job I have ever tackled in this world is that of making money. It is, in fact, almost as easy as losing it. Almost, but not quite."-H.L.

Rare coins are not just an enjoyable hobby anymore. Nor are the majority of serious collectors "hobbyists." Ours is an "investment industry" that is growing up, and growing up fast. There will always be a place for schoolboys and retired gentlemen whose needs are wonderment and something to fill the hours, whether idly or in pursuit of scholarship. Increasingly, however, rare coins are the domain of investors who relish owning precious things which offer privacy from prying eyes, intrinsic sparkle and historical worth that never cease to delight, and the magic of profit!

Much has been written about the pleasures of numismatics, which are such private matters that it is usually of dubious value to expound upon them anyway; no writer can replace your own imagination, only stimulate it. What I propose to do here is stimulate your thinking about that last quality that draws investors to numismatics—"the magic of profit". And there won't be any hype here. Just a good, hard look at Mencken's "easiest job" in our maturing market.

Interestingly enough, that old literary sage penned those words in 1922, and you could make a solid argument that he was as prophetic as could be. The 1920s were heady times - the stock market was growing up and lots of investors were cleaning up. But Mencken possessed an almost uncanny ability to see through propaganda, and perhaps even to peer into the future. Seven years after his humorous comment appeared, many investors found out just how easy it was to lose money, and just how unhumorous it was. And they lost it in a market that seemed to have no end in its potential to make, not lose, money.

Serving collectors of early American Coppers requires a high level of knowledge and specialization.

Much like the stock market of the 1920s, the rare coin market of the 1990s is continuing to mature. Money is being made, and will continue to be made. Indeed, wealth is being created. Perhaps not as much as many were predicting just a short year or two ago. And perhaps the market is not as mature as some would have led you to believe. But I speak here of longterm trends, and a long-term developmental process that will continue in the years to come.

Many investors perceive that rare coins are still in their infancy as an investment, and they are making judgments today that may improve their financial condition in years to come. Largely, these people are of an independent mind. They may seek guidance through the advice, opinions, and services of one or more professional dealers, but their decisions are their own. They have Mencken's ability to see through the propaganda. And there is still a lot of propaganda to see through. These free-thinking investors will be the big winners among rare coin enthusiasts. They will be the equivalent of the investors in the stock market of the 1920s who came through the crash as wealthy men.

The losers in the stock market crash of 1929, by and large, were investors who "bought" the propaganda of promoters, who believed their hype that "there can be no end to this market." They allowed themselves to follow; they gave in to the temptation to have "more" (listening to the marketers who all told them that they could have more). Those who wanted more, lost more.

What determined the winners in the stock market of the 1920s? What could make the winners in the rare coin market of the 1990s? To be sure, luck will have something to do with it - as always. Mostly, though, it is an ingredient known as "contrarian thinking". Winners dare to be different! And no easy task it is to go against the instincts and actions of the herd. It is, however, the key ingredient for success.

Expertise in the Overton varieties requires specialization.

I've said the market is growing up fast. How so? Well, in a number of ways. The old-time dealer charlatans, who only bought circulated coins and only sold uncirculated coins, are diminishing in numbers. There will always be some, but as a class they are fading away. The advent of the certification services has not made grading into a science; it is still an art, as anyone who has resubmitted coins can attest. However, certification has promoted a widespread definition of coin grades - there is more agreement today among dealers about how to properly grade than ever before. This is the long-term value of the certification services, and not making sight-unseen trading possible or enticing Wall Street's volatility into the coin market.

Nor has the self-serving prophecy made by certain big dealers of the 1970s come true: that the future would be dominated by big dealers, themselves to be owned by still bigger companies. Experience has taught that the bigger companies could not provide the kind of intimate, one-on-one service needed by the maturing market. Instead, the market has come to be dominated by a variety of smaller companies directed by highly skilled, knowledgeable numismatists who gladly share their learning with clients whose real service is guidance, not mass-marketing efficiency.

Specialists in Commemoratives have the added benefit of many different designs (Continued on next page -)

PUBLISHER—Ron Downing
CONSULTING EDITOR—Edward Judd
ANALYST—Robert Korver

The MONTHLY SUMMARY and Complete Sense Pricing Guide reports on those areas which are less voisible. The weekly COIN DEALER Newsletter (Cross-heef Reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor you may buy and sell coins through a dealer for a fee.

Subscription Information: The Monthly Summary and Complete Series Pricing Guide is mailed each month to subscribers of the weekly Coin Dealer Newsletter at no extra charge! The Monthly Summary is not a recap of the weekly CDN; it's a supplement.

A Subscription to the weekly Coin Dealer Newsletter [Greysheet] is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years.

Address all subscription applications to:

#### Market Sense & Experience: A Specialist's View

(Continued from Page One)

The coin market is also maturing, fast, as a place of exchange. More and more dealers specialize in certain kinds of coins; they are defining the quality they handle as well as the countries and denominations of their expertise and inventory. Unlike the old-timers who hoped they would never again see the coins they sold, today's specialists want to be able to buy back their wares. They have defined what quality is, they understand that this quality is in short supply, and they know that they will have a need to repurchase what they sell in order to participate in this new market.

The coin market is also becoming more international, rather like the fine-arts market. This is why I made my decision some years back to specialize in the finest English coins. Increasingly, "U.S." dealers are handling (and themselves investing in) coins of foreign countries. The major reason for dealers' diversification into the world coin market, of course, is value. Dealers are starting to see that various world coins have a big future. Even more, it is increasingly apparent that certain world coins are downright cheap compared to equivalent United States coins—they are extremely underpriced, and as such are an excellent store of value even if their potential is not realized in the short-term. Remember that the key to a 'hind-sight' definition of "underpriced" in a supply-demand marketplace is to correctly judge long-term demand trends.

American dealers specializing in English coins have the advantage of a 'common language'.

One principle of understanding long-term trends is not to mistake who is leading the development of the American market in world coins. It is not the dealers; rather, this market segment is being led by investors and savvy collectors. Dealers are participating, of course, but it is the nonprofessional who is leading the way to a developing world coin market.

In the future, we will see most American rare coin firms dealing not only in U.S. coins, but in a variety of world coins as well. The principal challenges for them will be (1) education, and (2) the development of buysell levels for all major coinages. Analytical books will be published in a variety of specialized areas, much as has been the case in U.S. numismatics during the past two decades. More reliable price-guides for World Coins will be published, and perhaps someday even a weekly CDN for World Coins! As more publications reflect market activity, familiarity with these world issues will become more widespread, and the coin market will have risen to the level of sophistication presently found in the finearts market. From that point, the world coin market will become selfpropelling. It will always, of course, experience trends, ups and downs, lackluster times and booms, just like the stock market. That is because emotions impact on all financial markets; that is what makes them exciting. They challenge the skill, knowledge and stamina of the seasoned investor, who must learn to use his emotions to make money, not lose it.

Will Early U.S. Gold become a significant specialty?

As Mencken indicated, the individualist, the contrarian thinker and investor, wins by not following the crowd. He leads; he anticipates; he envisions. In any financial market, such an investor buys ahead of the market and sells into it. In other words, he finds what the masses have not yet been able to discover for themselves, waits for his 'secret' area to get "hot", and sells to those scrambling to buy into the newest money-maker. The "magic of profit" is what motivates all investors. Getting to enjoy this magic, and deserving to enjoy it, are almost as easy as losing money by following the crowd. Almost, but not quite.

# LIBERTY SEATED HALF—DIMES Small in Size, Large in Type Varieties

You have to wonder if Christian Gobrecht could have known. After being confined to reworking John Reich's Bust designs for several years, Gobrecht was given the opportunity to redesign a national coinage in the mid-1830s. Reich's Bust designs (with modifications) had endured for 30 years—could Gobrecht have suspected that his engraving of Thomas Sully's Liberty Seated design would grace American coinage for more than half a century? Since this design (and its many permutations) dominated U.S. coinage for one-quarter of the existence of our Republic, it might be instructive to look at a few questions. After so many decades of Liberty's head, why this sudden emphasis on the seated figure, and why on all of the silver issues?

Certainly, some of these decisions must be attributed to the Director of the Mint. Breen advises us that after Gobrecht's design was adopted on the silver dollar in late 1836, Mint Director Robert Patterson ordered the same design to "be translated into working dies for all other silver denominations as quickly as practicable." It is uncertain whether Patterson had some direction from the Secretary of the Treasury or other politicians in these decisions.

Where did Gobrecht's (and/or Sully's) concept of a Seated Liberty come from? We know that Gobrecht earned his reputation as a bank-note engraver and medalist, and during the 1820s had consistently worked to keep his name and reputation known to Mint officials. Chief Engraver William Kneass suffered a stroke in 1835, and Gobrecht was appointed Second Engraver. His work seemed to consist largely of preparing working dies, no small task during a period of greatly increasing Mint production; never-the-less, this was work that could be described as more technical than artistic.

When assigned the task of redesigning the nation's coinage, it is not surprising that Gobrecht would have started with the Dollar, since this was the basis of our monetary system, and the larger size of the flan allowed the artist to more fully develop his ideas. It is known that a drawing by Thomas Sully was obtained by Patterson, and was eventually reworked by Gobrecht into an effective coinage design. What would be surprising is that Gobrecht, after so many years of hard work to get into this position, would not have had many of his own ideas already prepared. While it is always risky to judge the artistic temperament, one might expect that, as an artist, Gobrecht would have preferred to use one of his own concepts, rather than Sully's.

It is also especially intriguing to judge the degree of British influence which was to dominate American artistic design; not just in coins, but in all fields of art. Artists, too, are influenced by the winds of taste and current styles of design, and it seemed especially important for the Americans (who considered themselves to have little indigenous art) to be as cultured and refined as their British mentors. It is hard to deny that Gobrecht was not influenced by the seated goddesses or Britannias that appeared on other coins, although if Patterson had chosen the concept, Gobrecht would have had no choice but to execute it.

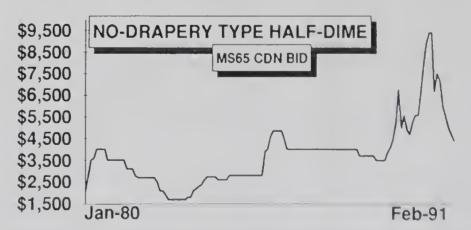

Anyone disillusioned over the fact that Gobrecht did not originate the design for the obverse of the "Gobrecht" dollar will be equally unhappy over "his" reverse. Gobrecht's engraving on the reverse follows Titian Peale's drawing of Peter, the Mint Eagle. Gobrecht followed still other ideas for the fractional silver coins. The reverse eagle on his quarters and half-dollars was a revision of Reich's design. At least the laurel reverse on the half-dimes and dimes was new, and may be viewed as the "most" original Gobrecht artistry on the "Gobrecht" coinage

Despite Patterson's directive that the new designs be prepared as quickly as possible, the continuing demand for working dies substantially prolonged production of the new hubs. Despite the "regular issue" status of some of the Gobrecht dollars from the 1836-1839 period, serious production did not begin until 1840—and *then* with the design as modified by Hughes (more about this later). 'Gobrecht' Half-Dimes were produced from 1837 to 1873; Dimes from 1837 to 1891; Quarters from 1838 to 1891; Half-dollars from 1839 to 1891; and Dollars from 1836 (or 1840) to 1873.

The first newly designed half-dimes were struck on July 25, 1837, the event being marked with the production of perhaps 20 proof specimens. Nearly one and a half million business strikes were produced before the end of the year, and dies were prepared for an 1838 emission from New Orleans as well. Numismatists have long been interested in the issues of 1837 and 1838 without stars, although consideration of their artistic merit may be difficult without resorting to comparing them to the much more 'popular' stars obverse.

It seems obvious that Mint authorities were not pleased with the naked field look, and stars were ordered to be individually punched into the dies produced from the old starless hub. Half-Dimes from this 1838-1840 period are usually known simply as Gobrecht's design (with Sully's contributions as designer somewhat forgotten). The question of artistic credit, whether it should lie with the designer or engraver, is not simply an aesthetic question. Certainly, a superior engraver can rescue an inferior design, just as an inferior engraver could destroy the most talented design. The real question is the degree to which the skilled engraver must faithfully execute the design given him; this determines the questions of credit or blame.

During the fall of 1840, Mint Director Patterson reinforced the British in fluence on American coinage, hiring the Anglo-American Robert Ball Hughes to modify the Liberty Seated design. The redesign, usually known as the Extra Drapery design (1840-1853), would have been better nick named the Pudgy Princess. Instead of the earlier slender Liberty, Gobrecht's new engraving depicts an overweight and overclad Liberty, which Breen ascribes to the need for "respectability". Indeed respectability was certainly important for the solid English middle class, and goodness knows we upstart Yanks could have used a little more of it (some things never change). One wonders it Gobrecht

#### LIBERTY SEATED HALF-DIMES Small in Size, Large in Type Varieties

(Continued from Page One)

gave Patterson exactly what Hughes designed as revenge, or whether his probable disappointment over having to execute such an atrocious design contributed to his demise in 1844. The changes certainly did nothing for striking quality, which numismatists recognize suffered markedly with the new hub.

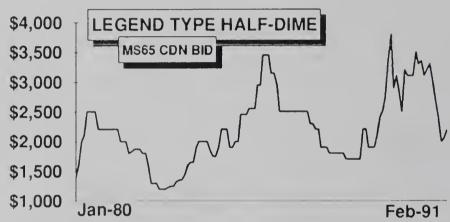

Longacre, who became Mint Engraver in 1844 upon the death of Gobrecht, ultimately had his chance to rework the Liberty Seated design as well. Longacre was ordered to place arrows at the date of the 1853 issue, which was to be struck at the newly reduced-silver standard. When the arrows were ordered removed by Mint Director Snowden in 1856, Longacre took advantage of the opportunity to rework the old obverse hub.

Early in 1859, Longacre's new assistant Anthony C. Paquet prepared a new obverse hub for the Half Dime only. Among the differences from other

denominations were hollow stars, slimmer arms, and a larger head, with substantial changes in Ms. Liberty's apparel. The new design was used to strike Half-Dimes in 1859 & 1860, as well as special fantasy 'patterns' used in Snowden's machinations. The artistic lineage of these pieces might be described as Paquet after Hughes after Gobrecht after Sully.

Meanwhile, Longacre himself prepared completely new hubs for the Half-Dime and Dime during 1859. Longacre's 1859 set of pattern half-dollars contained a reverse, "Newlin's Wreath of Cereals" which included Corn, Wheat, Oak, and Maple. There remains substantial confusion over who Newlin was and his contribution to the concept. Due to the space requirements to reproduce this detailed design, it is understandable that Longacre proposed it for the half-dollar. It is also only too typical that it should have been ordered used on the Half-Dime. Of course, using this reverse forced Longacre to place the statutory legend on the Obverse; since Longacre was also reworking the obverse, the Stars were replaced by "UNITED STATES OF AMERICA".

Longacre's new design was produced from 1860 to 1873. Since it was produced independently of Paquet's contemporary effort, the genealogy reads Longacre after Hughes after Gobrecht after Sully. By 1873, the silver Half-Dimes were being replaced by the more popular Shield Nickels, and their production was abolished in the Mint Act of 1873 (along with silver trimes).

#### Half-Dime Types:

1837-1838. Gobrecht, after Sully (no stars)
1838-1840: Gobrecht, after Sully (no drapery, with stars)
1840-1853. Hughes, after Gobrecht, after Sully (stars, with extra drapery)

1853-1855 Longacre, after Hughes, after Gobrecht, after Sully (arrows at date)

1856-1859: Longacre, after Hughes, after Gobrecht, after Sully (stars, no arrows) 1859-1860: Paquet, after Hughes, after Gobrecht, after Sully (not normally collected as Type)

1860-1873. Longacre, after Hughes, after Gobrecht, after Sully ["Cereal Wreath" or "with legend"]

### CALIFORNIA FRACTIONAL GOLD

by Robert B. Lecce

GOLD!!! That was the cry of James Marshall in January of 1848 at Sutter's Mill, in California. This event caused one of the most frantic stampedes of humanity in history. Word spread like wildfire. People came from the North, South, East and West with dreams of finding their fortunes in the Gold fields of California. Almost overnight, the little Spanish village of San Francisco was transformed into a roaring sea of humanity. San Francisco, California, and maybe even America would never be the same. The famous Gold Rush of 1848 was on.

### THE NEED

San Francisco's population had swollen enormously by the early 1850s. There was a growing need for some form of monetary exchange. Gold dust and nuggets were the common form of exchange, but not always to the satisfaction of all concerned. For this system to have worked, everyone would have had to carry a scale, as well as being able to reckon prices in some very different 'denominations.' The price of a drink was a pinch of gold—that was all the barkeep could get between his thumb and forefinger when he reached into the miner's poke. If the barkeep had a hand the size of a catcher's glove, that could have lent itself to a mighty expensive drink!

The need for a more standard form of monetary exchange gave birth to many of the territorial gold coins from the San Francisco area that are so very valuable today. One of the first to appear, in May of 1849, was the \$5.00 coin of Norris, Grieg & Norris. There were many others that soon followed: Five-dollar, ten-dollar, and twenty-dollar coins all helped greatly in filling the need for a more consistent form of monetary exchange. However, for conducting the business of everyday life, a form of small change was needed to complete the system. This was the reason behind the production of California Fractional Gold coins.

On August 25th, 1852, the Daily Alta California ran a story about an '1852 Half Dollar California Money which looked very much like the Federal \$1.00 gold coins' of the same period. This description fits the coins made by A.L. Nouizillet in 1852. Other early entrepreneurs (such as Nouizillet & Routhier, Frontier, Diviercy & Co., M. Deriberpe, Gaime, Buillemot & Co.) all began producing California Fractional Gold to meet the need for small change. Certainly, other manufacturers still remain unknown today. All shared the desire to profit from the production of coinage for circulation—especially considering that the minter was able to determine the amount of gold in his coinage or his production charges.

### THE EVIDENCE

For many years, it was very difficult to distinguish "Genuine" California Fractional Gold coins from the more spurious "Souvenir" pieces produced in later years. For many years, numismatists believed that all coins with some mark of denomination were genuine, and circulated as small change [1852-1882]. This may have been true, but in the past it was an invitation to counterfeiters.

Another view was that nearly all such coins were trinkets and souvenirs made circa 1870-1915 by jewelers, but this view was proven to be incorrect on several occasions. The Winfield Scott, a sidewheel steamer of almost 1300 tons, departed San Francisco for Panama on the first of December, 1853, with 400 passengers and almost \$900,000 in gold treasure. In poor weather, the ship struck rocks about 30 miles off the coast of Santa Barbara, was badly damaged, and most of her cargo was lost. While scuba diving in 1963, Glenn Miller located the remains of the Winfield Scott. The wreck contained some Federal and Territorial gold coins, as well as many California Gold pieces dated 1853 – proving that the coins came from that era.

In a recent conversation, Walter Breen mentioned several coins that he examined from the treasure trove of the S.S. Central America—another recently located wreck. A three-masted sidewheel steamer, she was a little more than half the size of the Winfield Scott. She had made numerous eastbound trips (almost fifty in all!) carrying many tons of gold during her service—in fact, she accounted for nearly one-third of all the gold carried from the California Gold Rush!

She departed from Havana on her final journey on the Eighth of September, 1857, bound for New York, with good weather forecast. The weather off the coast of the Carolinas deteriorated to the point where the S.S. Central America found herself in a hurricane! She sank on September 12th, in about 7000 feet of water, going down with 426 passengers and crew, and over \$2 million in gold (much of this in San Francisco coinage from 1855 and 1856). According to the Guiness Book of World Records, recovery of some of her treasures has already produced several records, including the greatest numismatic value in any treasure trove (maybe more than 1 billion dollars) and the largest gold ingot (754 ounces). So far, there have been only a few California Fractional Gold coins recovered from this wreck (mostly larger Territorial gold coins have been recovered). One ¼ dollar octagonal Liberty Head, dated 1856 (BG-111) that Breen examined had just been raised from the ocean floor, and I believe that many more Fractional pieces will be found, proving once and for all that many of these coins were used as circulating small change.

### THE REFERENCES

For almost 150 years, California Fractional Gold has, in my opinion, remained one of the most undervalued series in American numismatics. The most evident reason for this can be found in *California Pioneer Fractional Gold*, by Walter Breen with the collaboration of Ronald J. Gillio. This important work, published in 1983, concluded that Fractional Gold has "suffered alike from lack of information, from misinformation, and from poor information."

The first attempt to create a reference for the collecting of California Fractionals with some direction was made in 1932 by Ed M. Lee; a revised edition was published in 1970 by his son Kenneth W. Lee to include most of the material compiled over the thirty-eight years since his father's original work. I believe that the most significant advance made towards collecting came in 1979 with the publication of the final work from the Lee family: California Fractional Gold by Kenneth W. Lee. This work provided the collector with the tool needed to collect these tiny pieces of history with some semblance of order. The photographs he included helped enormously, with more than 500 different varieties to challenge the collector.

Breen & Gillio's California Pioneer Fractional Gold is by far the most comprehensive and informative reference ever written on the subject, with lengthy descriptions of each coin and superior photography. With the possibility of a new work by Walter Breen coming out later this year (or early next), California Fractional Gold could enjoy a resurgence of interest.

The necessity of an accurate and up-to-date reference to make collecting a possibility also depends on an accurate pricing system. In my opinion, one of the reasons for the lack of recent interest in the series was a book written by a collector/dealer which many students of the series felt was written only for self-aggrandizement, and which contained an unrealistic set of values. By the late 1980s, the value of these coins had reached bottom. The famous Lee Collection was auctioned by Superior Stamp & Coin, and many issues with just several known to have survived were selling for just a few hundred dollars. Something was clearly needed to "legitimize" the series.

The Professional Coin Grading Service (P.C.G.S.) began encapsulating "Cal-Gold" (dealer slang for California Fractional Gold) in June of 1990. I believe that this action alone has created a new interest in the entire series. The collector and dealer alike can finally examine his collection of Cal. Gold without worrying about sneezing and finding his collection in another state!

### MONTHLY SUMMARY

AND COMPLETE SERIES PRICING GUIDE

DBA COPYRIGHT 1991 COIN DEALER NEWSLETTER, A DIVISION OF CDN INC. Reprint of any issue without written permission is expressly forbidden by law.

EXECUTIVE DIRECTOR—Pauline Miladin EDITOR—Dennis R. Baker GRAPHICS—Shane Downing CIRCULATION & ADVERTISING—Betty Morris PUBLISHER—Ron Downing CONSULTING EDITOR—Edward Judd ANALYST—Robert Korver

The MONTHLY SUMMARY and Complete Series Pricing Guide reports on those areas which are less volatile. The weekly COIN DEALER Newsletter Grapaherth Reports the national. Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sightness. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market, such bids may include consideration of all costs attendant to certification for a particular service leads for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate extictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor you may buy and sell coins through a dealer for a fee.

Subscription Information: The Monthly Summary and Complete Series Pricing Guide is mailed each month to subscribers of the weekly Coin Dealer Newsletter at no extra charge! The Monthly Summary is not a recap of the weekly CDN; it's a supplement.

A Subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years.

Address all subscription applications to:

### CALIFORNIA FRACTIONAL GOLD

(Continued from Page One)

### THE COINS

There are three denominations in the series (25¢, 50¢, and \$1.00), and each denomination is found in both round and octagonal types. There are many unique and semi-unique pieces in the series. With even the most common pieces having a population of less than 200 (with the exception of the Kroll Hoard, to be discussed later), every piece of Cal. Gold that you might encounter is truly a rare coin. It is the belief of this writer (and many other students of the series) that less than 30,000 pieces exist for the entire series.

Breen has broken down the series into three periods:

Period One [1852-1856]
The Cal. Gold coins of Period One, I believe, were used during the California Gold Rush as circulating small change. I also believe that the production of these stopped at the time that the San Francisco Mint went into full-scale production. Simply, the need for Cal. Gold of uncertain value was diminished by the Mint's production of fully trust-worthy coinage in the Bay area.

### Period Two (1859-1883)

The production of the Period Two coins lasted for over two decades. In 1883, Col. Henry Finnegass, San Francisco District, Chief of Operations for the U.S. Secret Service, seized dealer's stocks of Cal. Gold, using the reasoning that manufacturers of these pieces were in direct competition with the U.S. Mint. I believe that many pieces dated 1857 and 1858 were made at this time because the Secret Service deemed all Cal. Gold pieces minted after 1882 would be confiscated!

### Period Three (dates uncertain)

Period Three coins still generate the greatest controversy among students in the field. Many producers as late as the early 1900s were minting large quantities of low-karat and low-quality pieces. One of the main producers was a New York jeweler named Herman Kroll, who made coins of all three denominations. Most were of 9 Kt gold and of poor quality. Kroll sold 811 pieces to A.C. Nygren sometime between 1883 and the early 1900s, which were sold by Henry Chapman in his 1924 auction of the Nygren Estate coins. In the 1960s, some of Kroll's dies surfaced and their new owners made restrikes which were of much higher quality than the originals, and some of which were as pure as 22 Kt. Most were on thinner planchets and have reeded edges, rather than the plain edge on the originals.

This writer and several other students dispute all of the Period Three coins as part of the Cal. Gold series. In a recent conversation with Mike Brownlee, the prominent Dallas collector and dealer in the series, he offered the opinion that "All of the coins of Period Three are backdated issues of low karat gold and of poor quality, and by no means should be included in the series." Ken Lee, who has a solid claim to being the 'father' of Cal. Gold collecting, was never particularly interested in Period Three coins - there were only three coins from this period in the Lee Collection,

and they were not obtained knowingly. P.C.G.S. will not even encapsulate any of the coins from Period Three.

### RECENT TRENDS

Enthusiasm was high at the Superior Auction in February, when many coins from the Lee Collection again appeared on the block. It seems that these coins are now being encapsulated and are becoming popular again, after a hiatus of over a decade. In 1979 and 1980, these coins had peaked in popularity and price along with other U.S. coins, but only the "other coins" saw the dramatic price increases and swings during the 1980s.

Some of the highlights of the Superior sale included: BG-411 50¢ Round Eagle Reverse, Rarity-8 (3 known) PCGS62, \$6,325 (A coin described as Unc. sold at \$14,000 in the Carnegie sale in Nov. 1980); BG-435 50¢ Round Arms of California, High Rarity-6 (13-18 known) PCGS58, \$3,300 (An EF sold for \$21,000 as Lot 536 of the Grafton Sale by Kurt Krueger in May 1980); BG-602 \$1 Round, Low-rarity 7 (10-12 known) PCGS55, \$3,575. With very few auction records, this coin sold in the Lee Sale at \$3,300 near the bottom of the recent market.; BG-716 25¢ Oct. Liberty Head, High Rarity 7 (3-4 known) PCGS66, \$1,760. This coin sold in the Lee Sale described as a Gem at \$550. No other Auction records.; BG-799-CC 25¢ Oct. Indian Head, Rarity-8 (2 known) PCGS63 \$1,760 (This coin sold in the Lee sale for \$3,080); BG-1017 50¢ Round Liberty Head, Rarity-8 (possibly unique) PCGS55 \$1,925.

The week following, at the Long Beach convention, dealers were scurrying about buying up all the nice pieces that they could find on the bourse floor. By closing on Sunday hardly a piece could be found for sale.

### **CURRENT VALUES**

Current dealer-to-dealer price evaluations for common types:

	<u> </u>		7 1
PCGS Grade:	MS60	MS63	MS65
25¢ Oct. Liberty	\$125-160	\$175-225	\$350-450
25¢ Rd. Indian	\$135-175	\$200-250	\$400-500
50¢ Rd & Oct. Liberty	\$125-160	\$185-250	\$400-500
50¢ Oct. Indian	\$175-225	\$250-325	\$450-600
50¢ Rd. Indian	\$185-250	\$275-350	\$500-650
\$1 Oct. Liberty	\$400-500	\$550-700	\$900 +
\$1 Oct. Indian	\$450-550	\$650-800	\$1000 +
\$1 Rd. Lib & Indian	\$1000-1200	\$1500-1800	\$2500 +

It seems to me that California Fractional Gold coins are destined to take a prominent place in American numismatics. New information and new varieties are still surfacing, and so much is unknown. With so much to be learned, this is one of the last vistas in numismatics. In summary, and to quote my colleague Allen James, it is especially poignant that "possibly one of the last frontiers in American numismatics was created by the Pioneers themselves."

Robert B. Lecce P.O. Box 50, Lawrence, L.I. New York 11559

# LIBERTY SEATED DIMES Volatile Bidding Marks These Decimal Delights Part 1

In the March 1991 Monthly Summary, we discussed Gobrecht's 'design' of the Liberty Seated Coinage, and charted pricing trends for the Liberty Seated Half-Dime Types. In this article, we will look at some of the special issues involved in the Liberty Seated Dime Types, as well as additional MS65 pricing charts. All of the population statistics are a combination of PCGS and NGC reports.

Liberty Seated Dimes were produced from 1837 to 1891. Production started on June 30, 1837 when Mint Director Robert Patterson ordered 30 brilliant Proofs to be struck for presentation purposes (of which 20 still survive, according to Breen). Gobrecht's obverse interpretation of Thomas Sully's design, in this first rendition, was struck without benefit of stars in the obverse fields. Breen points out that these Dime strikings demonstrated several technological breakthroughs, including the production of the reverse dies from a complete hub, a major step on the long road towards true mass-production of coinage.

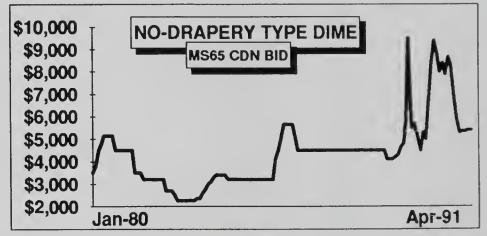

The Large Date 1837 No-Stars Dimes are the coins usually collected as type, as they are much more common than the Small Date 1837 or the 1838-O. Numismatists will recall that two pair of Dime Dies dated 1838 were prepared for New Orleans and shipped before Patterson's order adding stars to the obverse. Accordingly, the Half-Dimes and Dimes of New Orleans are the only 1838 No-Stars coins.

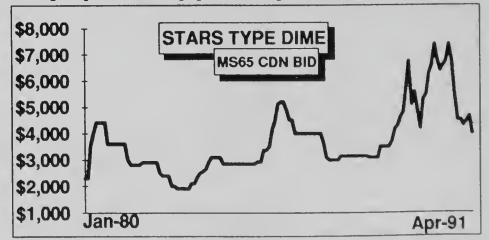

At first glance, the MS65 No-Stars Dimes seem to have been strongly affected by general market trends. Starting 1980 at a high Bid of \$5,000, they soared and held at \$9,000 through the end of the year. From that high, they dropped almost as rapidly back below \$5,000, and vacillated between \$3,400 and \$5,800 until the major rally in 1989. Curiously, the market rally in 1985 seems to have had little impact on their Bids; during 1985, Bid rose 'only' from \$4,500 to \$5,800. By 1988, Bid had returned to \$4,600; but in the great 'certified' run-up of 1989, they reached \$13,000 on two separate peaks, and were to soar to \$16,000 in the May 1990 rally before returning to \$7,800 in January of 1991. Current population reports indicate only 18 MS65 specimens, the lowest of any of the Seated Liberty business-strike Types.

Following Patterson's decision to add stars to the Liberty Seated obverse, stars were hand-struck into dies prepared from the starless

Hubs of 1837. This defeated the Mint's efforts to streamline the operation of die production, naturally, but may have been viewed as employment insurance. Such hand-work produced an exceedingly large number of variations in placement, and even usage of the star punch for Half-Dimes. The No-Drapery type of 1838-1840 has also spawned what is perhaps best called a "relative" Type—that is, the "partial drapery" variety of 1838 caused by a die clash. Though not a true design Type, it certainly provides the specialist with an interesting story when compared with the No-Drapery and Extradrapery Types.

The MS65 No-Drapery Type Dime followed most of the same trends as the No-Stars Type, with the exception of being much more active during the 1985 rally. Starting 1980 Bid at \$3,500, they climbed as high as \$5,150 before settling back into the \$2,250 to \$4,500 range that carried them through 1984. In fact, after showing a stable \$3,200 Bid from January of 1984 through May 1985, they began a rapid ascent that carried them to \$5,650 in only four months. They retreated to the \$4,500 level for three years, only to soar to \$9,500 in June of 1989, plummet to \$4,500 by October, and return again to \$9,400 in early 1990. Most of 1991 has seen Bid just over \$5,000. Through April of 1991, population reports indicate 65 specimens.

The Liberty Seated "Stars" Type Dime, produced from 1840-1860, has also been known as the "With Drapery" and "Drapery from Elbow" variety; these other names have some claim to superiority, since they avoid confusion with the Stars-No Drapery Type. Of course, confusion seems to have accompanied this design since 1840, when Patterson ordered the alteration of Gobrecht's perfectly delightful design into Robert Hughes' pudgy Liberty. The only good thing to say about the design of this Type is that the stars were placed in the hub, so that numismatists don't need to spend an abundance of time gazing at often poorly struck examples of Miss Liberty's redesigned charms.

e MONTHLY SUMMARY and Complete Series Pricing Guide reports on those areas which are less volatile. The weekly COIN DEALER Ne hysaked Reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coin. The coins may be certified or "Raw" (nacertified), but the grading MUST ADHERS to the current leading standard. Bids reported also devely in the certified SIGHT-UNSEEN market, such bids may include consideration of all costs attendant to certification for a particular in for a "Raw" coins may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids factly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sell a lower than current Bid/Aak levels.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor you

Subscription Information: The Monthly Summary and Complete Series Pricing Guide is mailed each month to subscribers of the weekly Coin Dealer Newsletter at no extra charge! The Monthly Summary is not a recap of the weekly CDN; it's a supplement.

A Subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years.

### LIBERTY SEATED DIMES Volatile Bidding Marks These Decimal Delights

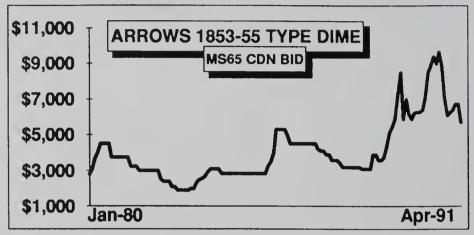

(Continued from Page One)

Specialists in this design have the most fun looking for varieties in the punching of dates; actually, "varieties" is probably too kind a word. What specialists are pursuing are the myriad of blunders in date punching, many of which have been laid at the feet of James Longacre (perhaps unjustly). Isn't it good to know that politics no longer play a part in Mint affairs?

MS65 Stars Type Dimes closely followed the pricing patterns of the No-Drapery Type. Starting 1980 Bid at \$2,300, Stars Types climbed to \$4,400 before sliding to the \$1,900 level by late 1982. They recovered to a \$3,200 Bid where they stabilized until the mid-1985 feeding frenzy pushed them up to \$5,650. Prices returned to the \$3,000 level until the rallies of '89 & '90 brought them to \$6,750 and \$7,400 respectively. The Stars Dimes actually enjoyed Twin Peaks in 1990, hitting \$7,400 twice before retreating to the \$4,000 plateau. There are 146 reported MS65 specimens.

While the Stars Type in Proof65 followed the expected large trends of the market during the last decade, it is unique among the Type Dimes in showing a rally in 1986. Starting 1980 Bid at \$2,400, the 1980 rally more than doubled Bid to \$6,250, only to slump to \$3,250 by late 1982. The Stars Proof65 Dimes then began a long and steady climb which carried them in the rally of 1985 to a high of \$8,500, and a further high of \$10,500 in December of 1986. The Stars Proofs continued to trade around \$7,500 until 1990 rally moving them all the way to \$15,000. They are currently trading around the \$6,500 mark. Current population statistics show 36 Proof65 specimens.

Numismatists are quite familiar with the results of the discovery of gold in California. As the price of silver began to rise, silver coins began their own migration from circulation into the melting pot. The results of this melting process are obvious in today's population figures.

Congress, following the suggestion of Mint Director George Eckert, confronted this problem by reducing the silver content of American coinage. Numismatists can argue about why the coinage design wasn't changed, but the official response to marking the new-weight coins was to add arrows to the date.

The Arrows Type Dimes of 1853-55 closely followed the pattern of the No-Drapery and Stars Type, and in the same general price range. This is especially notable because of the varying population counts. The 53-55 Arrows MS65 Types started 1980 at \$2,800, climbed to \$4,500, and sank to \$3,000 where they hovered before continuing their slide to \$1,900 in late 1982. By December of 1983 they had recovered, and found a plateau at \$2,850. In the 1985 rally they nearly doubled to \$5,300, then retreated to the \$3,000 level. In the 1989 rally they climbed to \$8,500, thence down to \$5,900, and again upwards to \$9,650 in 1990. During 1991, they have hovered around the \$6,000 mark. The current population count for MS65 Arrows Type is 74 specimens (vs. only 2 certified as Proof65!).

# Volatile Bidding Marks These Decimal Delights PART II

During 1859, Mint Director James Snowden ordered James Longacre to prepare a new version of the Liberty Seated design. Longacre prepared an entirely new set of hubs, with the reverse featuring his "Cereal Wreath" design. The size of this wreath forced the removal of the "United States of America" legend to the obverse, where it in turn replaced the stars. The difficulties in fully striking this wreath provided numismatists with ample opportunity to closely inspect their specimens for superior strike.

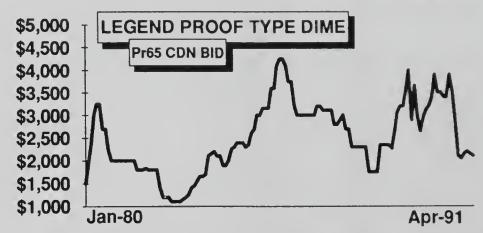

This most common of the Liberty Seated Dime Types shows perhaps the most unusual pricing swings of any of the types we have examined. The degree of volatility in pricing is usually determined by rarity; the more common issues usually are not as volatile. Perhaps the greater number of pieces in the marketplace helps to diffuse the demand; perhaps they are not as susceptible to marketing efforts.

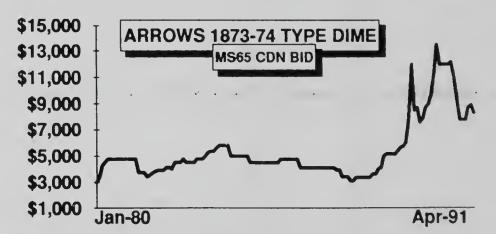

The MS65 Legend Type was Bid at \$1,200 in January 1980, and more than doubled to \$2,500 by mid-year, only to begin the long slide that saw Bid skid to \$850. Unlike the other types that remained fairly constant until the 1985 rally suddenly increased their value, the Legend Types began a steady climb out of the pits that saw them reach a \$3,150 Bid in late 1985 (a 270% increase over 42 months). Then, with the same sense of deliberation, Bid slid to \$1,500, until the coin was quickly thrust up to \$4,000 by the '89 rally. Unlike the other types that dropped quickly and then recovered with the '90 rally, the Legend Bids dropped only to \$2,500, and then rose only to multiple peaks just over \$3,000. In late 1990, the Type plummeted in demand, and it has been hovering around \$1,800. With 977 specimens certified, the Legend Type is by far the most common Liberty Seated coin available in MS65.

The Legend Proof-65 Type coin presents its own unique Bidding history. It is alone among the Dime Types in failing to reach new highs in the rallies of 1989 & 1990. The most common of the Proof Liberty Seated Dimes, the Legend Type started 1980 Bid at \$1,500. The 1980 rally doubled Bid to \$3,250, but a series of lower plateaus over the next few years would see Bid bottom at \$1,100 in mid-1982, and then to steadily climb to a peak of \$4,250 in late 1985. The Legend Proofs slid to \$1,750, recovered to \$4,000 in June of 1989, and \$3,900 in March of 1991. They are currently Bid around the

\$2,100 mark. With a population of 790 certified examples, Proof65 Legend Types are almost as common as the MS65 business strikes.

While the Arrows Type of 1853-1855 provides numismatists with the opportunity to relate wonderful stories of discovery, avarice, and greed (in short, all the human qualities that go into a good story), the Arrows Type of 1873-74 presents only the opportunity to relate confusion.

The Mint Act of 1873 ostensibly tried to provide a more metric basis for the weights of our coinage. The new weights designated were well within the production tolerances of the old weights, so in practical terms, this was a grand exercise in futility. Since the old and new weights were basically the same, how to differentiate the new coins? With Arrows at the dates, of course. If this was Congress' way to introduce the Metric system to America, they missed by a country mile.

The 1873-74 Arrows Type in MS65 has definitely followed a pricing history of its very own. It looks most like the No-Stars Type in ignoring the 1985 rally, but the '73-'74 Arrows also blunted some of the volatility of the 1980 Rally. Starting with a \$3,000 Bid, the '73-'74 Arrows rose to \$4,750 and stayed there for a year, before beginning an eight-year vacillation that took it as low as \$3,100 and as high as \$5,800. Recovery carried it to a \$12,000 Bid in June of 1989, then a drop to \$7,600 and onto a peak of \$13,500 in early 1990. The '73-'74 Arrows in MS65 is currently Bid at around \$8,000. Despite being a fairly common coin in Mint State, only 32 examples have been certified MS65 (vs. 74 specimens of the 1853-55 Type).

The Arrows 1873-74 Proof65 chart looks to be even flatter and less volatile than the same Type in MS65, but some of the appearance is misleading due to the graph's scaling (resulting from the enormous rise of the 1989/90 rallies). Proofs started 1980 Bid at \$3,000, climbed to \$5,500 and slid to the \$2,700 level, where they vacillated

The InCNTHLY SUMMARY and Complete Series Pricing Guide reports on those areas which are less volatile. The weekly COIN DEALER Neweletter (Chysalver) Reports the sational, Dealer-to-Dealer, wholesale cols market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" puncertified), but the grading MUST ADHERS to the current leading standard. Bide reported also consider activity in the certified SIGHT-UNSEEN market; such bide may include consideration of all costs attendant to certification for a particular service. Bide for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bide fluctuate strictly according to dealer buye, the CDN may not change Bide just because a dealer lowers his Bide, but will be strongly influenced by sells which are lower than current Bid/Ask levels.

INVESTORS NOTE: The prices in the Newaletter are from Dealer-to-Dealer transactions. As an investor you may buy and sell coins through a dealer for a fee.

Subscription Information: The Monthly Summary and Complete Series Pricing Guide is mailed each month to subscribers of the weekly Coin Dealer Newsletter at no extra charge! The Monthly Summary is not a recap of the weekly CDN; it's a supplement.

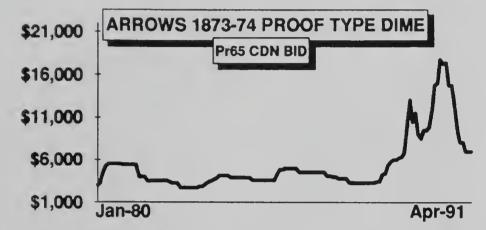

A Subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years.

Address all subscription applications to:

# LIBERTY SEATED DIMES Volatile Bidding Marks These Decimal Delights Part II

(Continued from Page One)

between \$2,700 and \$4,150. In the 1985 rally (although hardly noticeable on the chart), they managed to climb to \$4,950, only to return to the \$3,300 level for some time. The 1989 rally saw Bid soar to \$13,000 by June, plummet to \$8,500 in October, and then fly to \$17,750 in May of 1990. The coins are now Bid around \$7,000. With a certified population of 27, there are nearly as many Proof65 survivors as MS65.

The final graph plots current CDN Bids (for both Mint State65 and Proof65 Liberty Seated Dimes) against their current population statistics (as combined from the PCGS & NGC Population Reports). The resulting curve demonstrates one of the strongest truths about the wider coin market: As the population of an item grows, the Bid drops. This may seem like a self-evident truth, but there are several caveats. It seems obvious that the market is accepting the population reports as valid, despite knowing that multiple submissions (especially on higher grade material) has seriously inflated the populations of many coins. There may not be much of a difference in Bid between populations of 800 and 900, but look at what happens on the curve as you move from a population of 2 to a population of 25.

It also raises a larger question that we may examine in some future article. What happens when the Low-Pop/High Bid "rule"

3,300

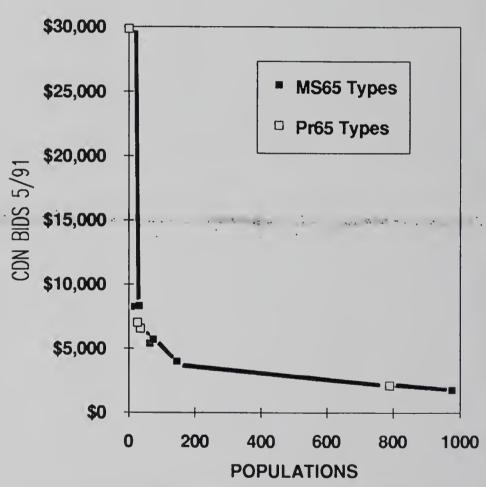

BID

8,000

conflicts with another "rule", such as that PLs are worth more than regular Morgans, and that DMPLs are worth more than PLs; or that Split Bands or Full Heads are worth more that their less fully struck counterparts. We can probably all remember when Proofs were more valuable and more desirable than their business strike counterparts.

Examination of other Liberty Seated denominations will continue in future issues.

# MONTHLY SUPPLEMENT AND COMPLETE SERIES PRICING GUIDE

**JULY - 1991** 

Vol. XVI No. 7

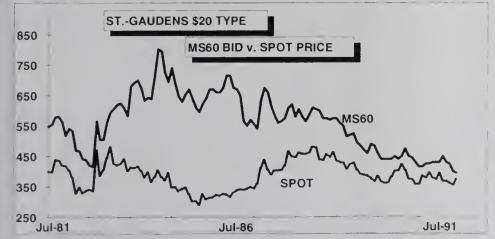

Single copy price: \$3.50

# St.-Gaudens Double Eagles, Narrow Spreads Spark Collector Interest

Can everyone remember the purchase of their first Double Eagle? Just feeling the weight meant that you were buying a coin of substance, and the allure of gold almost goes without saying. There were the emotions of becoming a "serious" numismatist, added to the probable wistful remembering of the failure to buy when prices were much lower. Perhaps most meaningfully, the purchase of one's first St.-Gaudens was probably accompanied by the awareness of ownership of one of the world's great pieces of numismatic art.

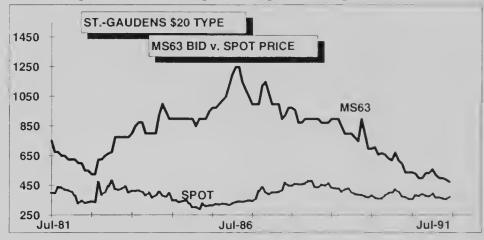

While the series certainly has its share of generic dates, there are formidable problems in the assembling of a complete date/mintmark set. Even getting past the problem of the 1933 \$20, there remains the arduous task of finding and purchasing the 1927-D, not to mention a half-dozen other elusive issues. Even among the common dates, one of the great (and unending) debates in numismatics is whether a particular coin is "underpriced" at current levels. In a supply/ demand marketplace, at least one that is acting efficiently, every coin should be "near" its true value. Constant flux may be the norm, but this minor volatility is best interpreted as part of the continuing search for true value. Of greater significance are the large market movements that define an "up-market" or a "down-market". Coin prices have traditionally been cyclical, and the "best time" to buy is naturally at the "bottom" of the cycle. Unfortunately, the "bottom" can usually be defined only after prices have started to rise, and more usually, after they have been rising for some time.

Let's assume that some new collectors wish to purchase examples of St.-Gaudens' artistry. Which coin should they buy, and how to time their purchasing decision? There are almost as many factors to consider as there are collectors, but a major component in the definition of the "best time" to buy just may lie with the intrinsic value of the coin and the "spread", or numismatic premium.

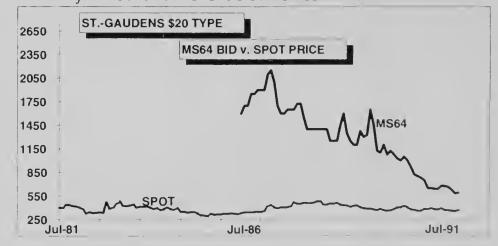

The collector who wants to buy an uncirculated example for the least amount of money will look first at an MS60. The coin is technically uncirculated, although the MS60 grade will mean a certain amount of surface marking. (In fact, the collector of limited means seeking a nicer-looking specimen might well consider an AU-58, but that is a topic for another article!) Looking at the price spreads between gold spot (based on 1 oz.) and the MS60 Bid for the last ten years (July of 1981 - July of 1991), the numismatic premium paid has never been lower. Even during the gold rally of Sept. 1982, Bid on MS60s (and the other grades) rose lock-step with the climbing spot

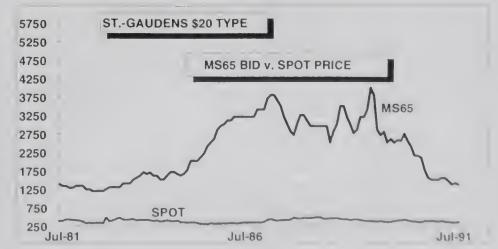

prices. Is this a good time to buy an MS60? There is always the possibility that gold spot may go lower, despite its general stability -- but is it possible for the spread to get even tighter?

The MS63 St. Gaudens Type coin has followed a pricing spread history very similar to the MS60. The relatively constant spreads of 1981 gave way following the Sept 1982 Gold Rally, and the spread increased dramatically through 1984. The last six years have been marked by a decreasing spread, which is now at the lowest point in a decade. An MS63 Saint, by most definitions an attractive coin, is now Bid just about 25% over its bullion content.

The spread history of the MS64 Saint, one of the newer grades adopted during the 1980s, reveals a remarkable change in attitude toward this coin. First, we need to agree that the MS64 is one fine-looking coin - a coin that during the 1970s and early 80s could have been sold as a Gem. When MS64 first became accepted as a grade, the numismatic value of the coin far exceeded its bullion content; the intrinsic value of its gold content was a relatively small component of its market value. Today, with the spread tighter than ever before, the intrinsic value is a major component of its numismatic value around 2/3 of its Bid. Here is a coin that now offers substantial quality at very little "risk" above base value.

DBA COPYRIGHT 1991 COIN DEALER NEWSLETTER, A DIVISION OF CDN INC. Reprint of any issue without permission is expressly forbidden by law.

EXECUTIVE DIRECTOR—Pauline Miladin EDITOR-Dennis R. Baker CONSULTING EDITOR—Edward Judd

PUBLISHER—Ron Downing ANALYST-Robert Korver GRAPHICS—Shane Downing

CIRCULATION & ADVERTISING—Betty Morris

The MONTHLY SUPPLEMENT and Complete Series Pricing Guide is a supplement to the weekly COIN DEALER Newsletter (Greysheel); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading MEST ADHERE to the current leading standard Bids reported also consider activity in the certified SIGHT-UNSEEN market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: The Monthly Supplement and Complete Series Pricing Guide is mailed each month to subscribers of the weekly COIN DEALER NEWSLETTER at no extra charge! The Monthly Supplement is not a recap of the weekly CDN; it is supplementary information. A Subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years.

Address all subscription remittances to:

the COIN DEALER Newsletter Dept. MS • P.O. Box 11099 Torrance • California 90510-1099

The intrinsic value of any MS65 coin should have little to do with its numismatic value - after all, we are talking about the value that one is willing to place on buying a premium-quality piece of history. On the spread chart of the MS65 Saint, the price of bullion should be almost an afterthought, and for the past decade, it has. What is apparent, however, is that MS65s are about as cheap now as they have been during that decade - and with the greater grading consistency inspired by the certification services, the certainty of obtaining a true gem is now almost assured.

The rise of the certification services has also had many other effects on coin pricing, not the least of which has been the market reaction to the population reports. The reports have plenty wrong with them, especially with their early failure to discount resubmissions and other "crackouts". But they also have greatly added to our understanding of the true rarity of many issues. What a decade ago were vague perceptions of rarity have now become much more quantified. The pop reports will never be perfect, but our knowledge of coins will never be perfect - they are one more useful component of the pricing decision. They belong in every numismatist's library.

The growing population counts of St.-Gaudens \$20s have certainly had a major impact on pricing. Who would have imagined that there were that many quality coins out there? Combined figures from the June 1991 PCGS and NGC Population Reports are instructive:

MS61 **MS62** MS63 **MS64 MS65 MS66** MS67 22216 60338 70418 38766 10227 776

As is so often the case, the population figures for the lesser uncirculated (and higher circulated grade) coins are lower than the true populations in the marketplace; this is a consequence of the natural resistance to expending high certification fees on lesser value coins. While the population counts are not a true sampling of the population, the relative counts between higher grades can be taken as reasonable. MS65 Saints, with more than 10,000 certified, are not rare coins! Even MS66, a coin whose quality is breath-taking, is borderline rare. The MS67, a coin which simply embodies the very best of St.-Gaudens' design, is available in the marketplace.

The following chart presents Bid at two year intervals for the MS63 Saint. The final column presents the combined PCGS and NGC Population statistics. It becomes immediately obvious which coins have now become recognized for their rarity.

We will make one final observation. What makes a coin rare? When the demand exceeds the supply, a coin becomes more valuable. If we define MS64+ Saints as desirable pieces for the Type collector, we have sufficient supply to satisfy 50,000 Type collectors. What makes a rarer date more valuable? Demand for rarer dates comes primarily from collectors who are assembling date/mintmark sets, with some small component from collectors who enjoy the ownership of rarer items. The enduring popularity of Saints is a tribute to the continuing number of collectors putting sets together there are still more collectors than there are dates to go around.

In the overall market, as fewer collectors attempt complete sets, ar I budget limitations mean collecting Type coins, the superpr miums paid for the ultra rare may decline. This is not necessarily a prediction we know that the "Better Dates" have been faring far better than the rest of the market during the past two years. But we also rrow that the coin market is in a state of flux right now, and that the rest of a de from now will be very different. Saints will still by programme or role but beyond that is anyone's guess.

Welcome to the new format for the CDN Monthly Supplement, Our new name more readily identifies the nature of this free companion to the weekly CDN - it has always been a "supplement" to the weekly prices, and not a "summary" of them. While changing to our new vertical format, it became possible to add the MS64 grade to all charts. We also expanded coverage to include some new issues. This is the first of many improvements that subscribers will be enjoying this year. While much about the SUPPLE MENT is new, we still examine all wholesale sources for information, from sight seen "raw" coins to sight unseen certified Bids.

# Would you invest \$33 and 25 minutes... to save \$25,000?

According to ICTA -- the Industry Council for Tangible Assets, the Internal Revenue Service has begun "auditing all coin dealers nationwide for compliance with the new cash reporting requirements (IRS Form 8300)."

There is no question about it - you will be facing increased government scrutiny of your business activities. The Currency Transaction Reports required by the 1970 Bank Secrecy Act may have been a joke once, *but no longer*. Failure to keep the records required and file all of the forms required could result in a massive fine - a *minimum* of \$25,000 per *incident*.

To provide you with the background information you need on this important issue, Media Resource Corporation now has available their VHS videotape *Currency Reporting Alert*. The tape features the presentation of Charles A. Intriago, Esq. to dealers at the Third Annual ICTA Dealer Day (March 1991, in Tampa, Florida). Mr. Intriago is an Attorney, has worked with Congress and as a Federal prosecutor, and is currently the Publisher of the *Money Laundering Alert* newsletter.

ICTA is leading the campaign to make the IRS regulations as reasonable as possible, and \$5 from the sale of each tape will be donated to that effort. David Lisot of Media Resource Corp., who produced this tape, also donated his services and production costs to ICTA.

Any dealer who thinks that this issue is not going to affect him is simply wrong...and the cost of being wrong starts at \$25,000. Wouldn't you rather invest \$33 now?

available for \$33 (\$29 plus \$4 shipping and	eotape Currency Laundering Alert. Each tape is handling). Please make checks payable to Medi
Resource Corporation.

# MONTHLY SUPPLEMENT AND COMPLETE SERIES PRICING GUIDE

**AUGUST - 1991** 

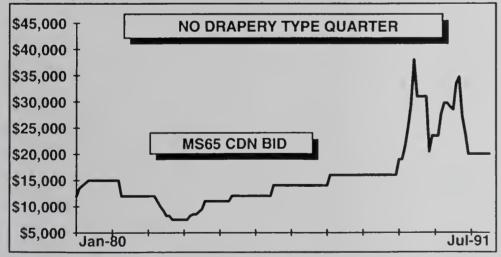

Vol. XVI No. 8

Single copy price: \$3.50

# Is This America's Favorite Type Series? Part I

In the May & June 1991 issues of the Monthly Summary (now renamed the Monthly Supplement), we continued our study of Gobrecht's 'designs' for the Liberty Seated Coinage denominations. In this article, we will look at some of the special issues involved in the Liberty Seated Quarter Types, as well as additional MS65 & Pr65 pricing charts. All of the population statistics are a combination of PCGS and NGC reports.

Liberty Seated Quarters were produced from 1838 to 1891. Over half a century, six major types were minted - although some might argue that the Arrows Types of 1854-55 and 1873-74 are really the 'same' design. The story of the Quarter denomination befits the often-confusing design story of the Liberty Seated coinage. During the early months of 1838, after completing work on the Half-Dime, Dime, and Dollar denominations, Mint Engraver Christian Gobrecht began work on the Liberty Seated Quarters. Curiously, Gobrecht made several variations on his earlier decisions, and the Quarter emerged noticeably different from his work on the larger denominations. Gobrecht coupled his interpretation of Thomas Sully's Liberty Seated design on the Obverse (see the first article in this series in the March 1991 Monthly Summary) with a variation on Reich's much older Reverse Eagle design (as modified by Kneass). The Quarter obverses bore stars from the beginning, no doubt a reaction to the frosty reception given the earlier No-Stars design on the Half-Dimes and Dimes. The first-time usage of "QUAR. DOL" on the reverse, replacing the more traditional 25¢, is also noteworthy.

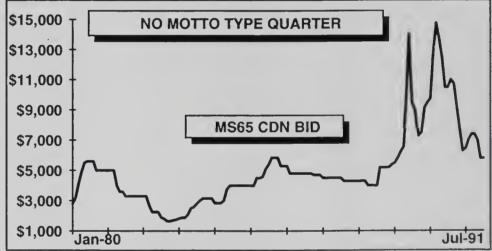

Production of the first Liberty Seated Quarters, the No Drapery Type, began in late September, after 20 "specimens" were sent to Secretary of the Treasury Levi Woodbury (it remains uncertain if these were actually proofs). Relatively few business strikes were made in 1838 (466,000 being struck). The rarity of Gem (MS-65) No Drapery Types is immediately evident from the Population Reports, with only 3 specimens being certified.

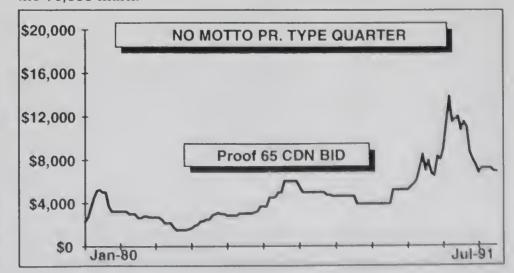

Bid prices on the MS65 No Drapery Quarters generally follow the market trends & cycles that we have seen in the other Liberty Seated denominations. Starting 1980 Bid at \$12,000, they climbed to \$15,000 by the end of the year, only to drop through a series of plateaus to reach \$7,500 by the end of 1982. They returned to the \$11,000 Bid level during 1983, managed to plateau at \$12,000 through most of 1984, at \$14,000 through most of 1985 and 1986 (pretty much ignoring the constant increases other coins were enjoying), and at \$16,000 through 1987. Between Jan. and June of 1989, they soared

from \$19,000 to \$38,000, only to settle back to \$20,500 by November. They peaked again in Sept. of 1990 near \$35,000, and are currently level at \$20,000.

The No Motto Type, also Known as the Extra Drapery Type or Drapery from Elbow Type, is another example of the 'improvements' added to Gobrecht's design by Robert Ball Hughes. Mint Director Robert Patterson's motivations in this decision are unknown; perhaps he preferred a pudgy Liberty. Hughes we can excuse, by assuming that since he was hired to make changes, he would certainly give them their money's worth. In an earlier article, we mentioned how Hughes' design may have reflected the midcentury Anglo-American need for respectability, but where is the evidence of any public outcry? And frankly, Gobrecht's design had to be considered tame after the earlier Bust coinage designs. One thing is certain: Miss Liberty's increased bulk did nothing to improve the metal flow during striking, and many of the coins produced during the 1840s are flatly struck. This might be a good place to mention that the non-contiguous years for this Type are 1840-1853, and 1856-1866; more on this later.

The No Motto Type in Gem condition is not as rare as one would expect, especially considering the abysmal strike on many of the coins. As of the reports of July 1991, 131 had been certified MS65. The No-Motto Gems started the decade Bid at \$2,800, doubled by July to \$5,600, finished the year at \$5,000 and sank to \$1,650 by late 1982. One year later they had again doubled to \$3,150, and the 1985 Rally saw them reach \$5,850. They spent the next two years between \$4,000 and \$5,000; but between June of 1988 and June of 1989, they soared from \$4,000 to \$14,000. Like many of the other Type coins that peaked during 1989, the high Bid levels could not be sustained, and they dropped nearly as precipitously as they rose, only to reach even higher levels during the Spring 1990 Rally. Bid is now around the \$6,000 mark.

\$7,000.

PUBLISHER—Ron Downing ANALYST—Robert Korver **GRAPHICS—Shane Downing** 

CONSULTING EDITOR—Edward Judd CIRCULATION & ADVERTISING—Betty Morris

The MONTHLY SUPPLEMENT and Complete Series Pricing Guide is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

Proof No Motto Quarters, certified as Proof65, are reasonably easy to locate, with 88 having been slabbed. Bid started at \$2,300 in Jan. of 1980, very close to the \$2,400 Bid for Gem With Motto business strikes (a coin with a current population of 551!). Bid climbed to \$5,250 by mid-year, spent the next twelve months sliding to \$2,650, recovered briefly, and then plummeted to \$1,500 in the Fall of 1982. Bid recovered to \$3,100 by October of 1983, then began a steady climb that would carry Bid to \$6,050 by the end of 1984. Bid reversed to \$3,900 through most of 1987 before hitting \$8,500 in the 1989 Rally, slid to \$6,500, and then soared to \$13,850 in the Rally of 1990. The Proof65 No Motto Quarter currently Bids around

As related in our previous articles, the discovery of Gold in California ultimately had a profound effect on the design of our silver coins. As silver began to rise in price, the melting pot claimed many an American numismatic treasure (\$100 face value of silver coin would yield more than \$106 as bullion!). Congress followed the recommendation of Mint Director George Eckert to reduce the silver content of American coinage about 7% in the Act of Feb. 21, 1853. In 1853, after production had begun on the standard planchet, Mint Engraver James Longacre was directed by Eckert to prepare dies indicating the changed weight. Eckert is credited with the idea of Arrows flanking the obverse date, and Rays surrounding the reverse eagle. While this is perfectly silly as a means of communicating information about changes in silver content, Longacre did produce one of our most treasured coinage Types. Perhaps it may just be that the Rays distract us from the Pudgy Percher, or just the sense that we always seem to get when holding rare coins that are also beautiful. After more than a century, governments are still making silly decisions, so perhaps it is enough to satisfy ourselves with the resulting artistic value. And while the Arrows & Rays is rare as a one-year Type, Eckert logically cranked up the Mint machinery and established the record for the greatest number of quarters produced annually to that time. The incoming Mint Director, James Snowden, decided to drop the Reverse Rays and keep the Obverse Arrows, thus turning a beautiful coin into a mediocre Type.

Arrows & Rays Quarters in Gem condition are rare; numismatists knew this for a long time before Population Reports were ever irnagined In circulated grades, the 1853 is almost common; as a

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a

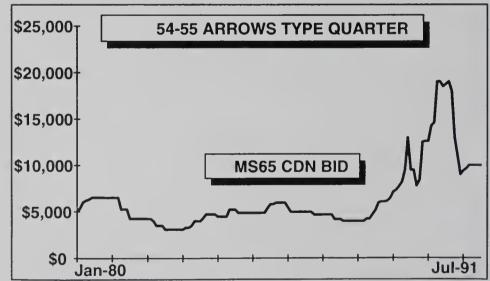

Subscription Information: The Monthly Supplement and Complete Series Pricing Guide is mailed each month to subscribers of the weekly COIN DEALER NEWSLETTER at no extra charge! The Monthly Supplement is not a recap of the weekly CDN; it is supplementary information. A Subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years.

Address all subscription remittances to:

the COIN DEALER Newsletter Dept. MS • P.O. Box 11099 Torrance • California 90510-1099

Gem, only 7 have been certified. This rarity has been reflected in their Bid history, although in some surprising ways. A&R Types started 1980 Bid at \$6,500, plateaued at \$8,750 for the better part of a year, and then slipped to \$4,250 by the end of 1982. 1983 saw them climb back to a \$7,500 Bid, 1984 to \$8,000, 1985/86 to \$8,500, 1987 to \$9,250, and 1988 to \$10,000. This was a "Blue-Chip" coin with a five-year record that even the most conservative investor could point to with satisfaction. We will leave it to other numismatists to speculate on the events of the next two years; suffice it to note that Bid leaped to \$35,000 by mid-1989, and even after the big drop, still ended the year at double the starting Bid. The 1990 Rally pushed the Type back up above \$25,000, but is now Bid around \$18,000.

Mint Director Snowden continued the Arrows Only design through 1855, and then decided to remove the Arrows as well. Purists will argue that the 'lighter' weight, No-Arrows, No-Motto coins of 1856-1866 are a separate Type. On the other hand, I'm not sure that anyone cares now anymore than they did then. In fact, one could also argue that Longacre's modification of the Quarter design in 1859, with some assistance from Anthony Paquet, also constitutes a type; at least here there are design changes, however minute. While increased silver production in California meant that melting would no longer be a problem, coinage production during the Civil War years was limited by other problems, including hoarding.

The Arrows Type of 1854 & 1855 in Gem condition is certainly not common, with only 21 certified, but it is substantially more available than the Arrows & Rays Type of 1853. Still, Type Bid in Jan of 1980 was not much lower than its more illustrious brother, at \$5,000. During 1980, it moved only to \$6,500, and after holding for some time began a long decline that would carry it to a \$3,100 Bid by late 1982. Bid climbed back to \$4,750 in late 1983 and hovered around the \$5,000 mark during 1984, and the \$6,000 level during much of 1985. It spent 1986 around \$5,000, dipping to \$4,000 during 1987. The Arrows Type began to climb earlier than many during 1988, ending the year at \$3,600 before hitting \$13,000 in June of 1989. After a brief return below \$8,000, it climbed even higher to a \$19,000 Bid in Spring of 1990. Bid is currently around \$10,000.

# VHS VIDEO TAPES

# for Love or Money

Assembling a great collection is truly a labor of love. But when given the right ingredients of time, opportunity, money, and a discerning eye, history can be made.

The Larry Shepherd Collection of U.S. Silver Commemorative Coins is just such a collection, and it is truly amazing in the quality of its coins. Spectacular is not too strong a word to use when talking about coins that have left many a numismatist speechless! David Lisot, President of Media Resource Corporation, is pleased to present a VHS videotape featuring Larry Shepherd, explaining his great love for Commemoratives, and starring his 50 piece Type Set.

Before the Shepherd Collection was encapsulated, magnificent color photographs were prepared. These form the basis for a tour through American numismatic history - through American history. If you are a collector of Commemoratives, you will know all about this collection, and will need to have this tape in your library. If you are thinking about collecting Commemoratives, this tape will inspire you. If you collect any other series, this tape will show you what can be accomplished.

The Internal Revenue Service has begun auditing coin dealers nationwide for compliance with the new cash reporting requirements (IRS Form 8300). You will be facing increased government scrutiny of your business activities, and failure to keep the records required and file all of the forms required could result in a massive fine - a minimum of \$25,000 per incident.

David Lisot, President of Media Resource Corporation, has made available their VHS videotape **Currency Reporting Alert**, featuring the presentation of Charles A. Intriago, Esq. to dealers at the Third Annual ICTA Dealer Day (March 1991, in Tampa, Florida). Mr. Intriago is an Attorney, has worked with Congress and as a Federal prosecutor, and is currently the Publisher of the *Money Laundering Alert* newsletter.

ICTA is leading the campaign to make the IRS regulations as reasonable as possible, and \$5 from the sale of each tape will be donated to that effort. Any dealer who thinks that this issue is not going to affect him is simply wrong...and the cost of being wrong starts at \$25,000. Wouldn't you rather invest \$33.95 now?

Please send me the following VHS videotapes:	
copies of <i>Currency Laundering Alert</i> ; \$33.95 (\$29.95 plus \$4 shipping copies of <i>The Larry Shepherd Collection of U.S. Silver Commemorative</i> the pair for \$60 (delivered)

# MONTHLY SUPPLEMENT AND COMPLETE SERIES PRICING GUIDE

# SEPTEMBER - 1991

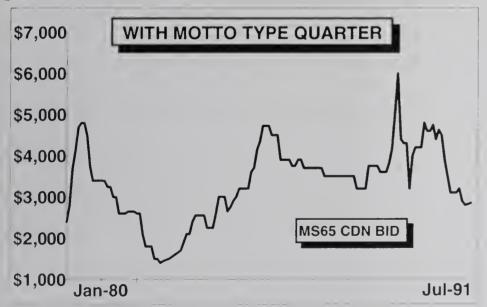

Vol. XVI No. 9

Single copy price: \$3.50

# Is This America's Favorite Type Series? Part II

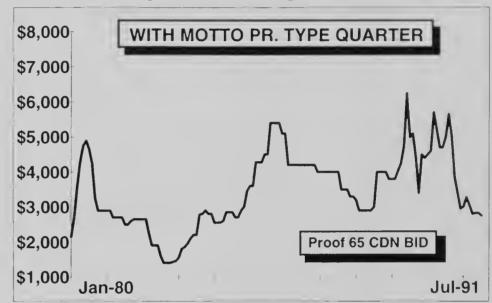

In the August 1991 issue of the Monthly Supplement (renamed from the Monthly Summary), we continued our study of Gobrecht's 'designs'-Liberty Seated Quarters. In this month's article we will complete our survey of the Liberty Seated Quarter Types, as well as additional MS65 & Pr65 pricing charts. All of the population statistics are a combination of PCGS and NGC reports.

The Congressional Act of March 3, 1865, among its multitude of numismatic provisions, also required the addition of the "IN GOD WE TRUST" motto to all U.S. coinage. The details of Rev. Watkinson's letter to Treasury Secretary Salmon P. Chase have been related elsewhere, and are an interesting addition to every numismatist's store of knowledge. The motto was added to the Quarter Dollars in 1866, although relatively few were seen in circulation. With little bullion coming into the Mint, with banks continuing their suspension of specie payments, and with silver commanding a premium in "greenbacks", few business strikes were produced over the next decade.

The With Motto Type Bid in Gem has been, in a word, exciting. With 551 certified Gems, this is hardly a rare coin, but it obviously remains a desirable one. The \$2,400 Bid in Jan. 1980, reached \$4,800 by June, returned to \$3,000 by June of 1981, and \$1,800 by June of 1982. Bid dropped as low as \$1,400 before 1983's market advances carried it to \$2,550. By the end of 1984, Bid stood at \$3,200; by the end of 1985, at \$4,500; then dropping over the next few years, to as low as \$3,200 during 1988, before ending at \$3,600. The Rally of 1989 swept Bid to \$6,000 before returning to as low

as \$3,200, only to quickly return to nearly \$5,000 before returning below \$3,000. Over 140 months, Bid has progressed from \$2,400 to \$2,850, with a bit of volatility to make the journey most interesting.

For a "rare" coin, the Proof65 Liberty Seated Quarter With Motto Type is pretty common; 584 have been certified to date (even more than the number of business strikes certified as MS65!). If you expect that the large population would make pricing on this Type more stable, you would be quite surprised. Bid in January of 1980, was \$2,150, only \$150 lower than the much rarer No Motto Proof65 coins. By June, Bid had reached \$4,900 (again, hardly lower than the \$5,250 No Motto Bid). Over the next 18 months, Bid would slide all the way to \$1,400, only to begin a steady recovery to \$5,400 by late 1985. As the cycle moved downward, Bid hit \$2,900 in Spring of 1988. The 1989 Rally raised Bid to \$6,250, and the 1990 Rally saw twin peaks around \$5,700. Current Bid is \$2,750.

The final Type that we will trace is the Arrows, or Arrows & Motto Type of 1873-1874. As we remarked in our article on the 1873-74 Dimes, numismatists have every right to be just as confused about this Type as the public was, not to mention Congress. The Mint Act of 1873, among the usual plethora of special provisions, tried to provide a more metric basis for the weights of our coinage. The new weights stipulated by the Act were easily within the production tolerances of the old weights, so in practical terms, the new law had no results. On the other hand, it did little damage, so perhaps modern Congresses should be encouraged to go and do likewise. With the old and new weights nearly identical, the Arrow punches were called out of retirement to alert the public to this important change in their change (actually, the arrows were newly designed by William Barber, just to keep the record straight). Without the Ar rows, they would have certainly missed the event. After 1874, the Non-Event was over, and the arrows removed

PUBLISHER—Ron Downing ANALYST—Robert Korver GRAPHICS—Shane Downing CIRCULATION & ADVERTISING—Betty Morris

The MONTHLY SUPPLEMENT and Complete Series Pricing Guide is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be bigher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

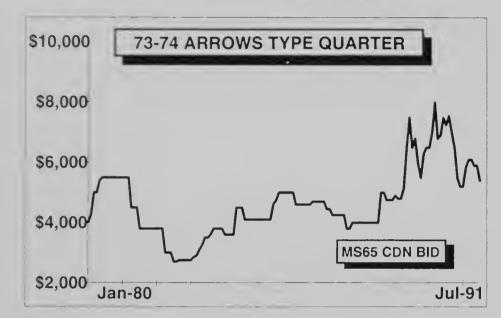

Subscription Information: The Monthly Supplement and Complete Series Pricing Guide is mailed each month to subscribers of the weekly COIN DEALER NEWSLETTER at no extra charge! The Monthly Supplement is not a recap of the weekly CDN; it is supplementary information. A Subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax).

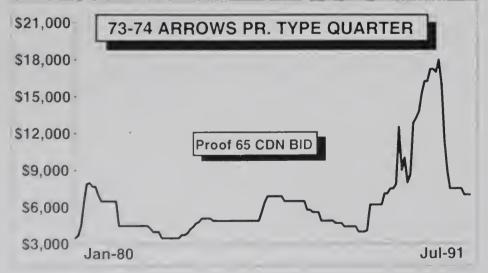

Address all subscription remittances to:

With a certified population of 65 pieces in Gem, the Arrows Type of 1873-74 is fairly common for a two-year Type. Compared to its rarity relative to the Arrows Type of 1854/55, however, its Bid level bears scrutiny. The '73 Arrows Type started 1980 Bid at \$4,000, climbing to \$5,500 by year's end. By Dec. of 1981, it had returned to \$3,800; by Dec. of 1982, to \$2,750. The next few years were spent vacillating around the \$4,000 mark, peaking at \$5,000 in late 1985. Sinking to as low as \$3,800 during 1987, Bid reached \$7,500 during the 1989 market rally, and \$8,000 in the 1990 Rally. The Type is now Bid around \$5,500.

While each of the pricing charts we have presented bear certain similarities, usually tied to the larger market trends, each has also shown some distinctive characteristics. None look quite like the Proof65 Arrows Type of 1873-74. With a certified population of only 35, the coin is much rarer than Proof65 examples of the No Motto or Motto Types (as would be expected), more surprising is its recent Bid history. The \$3,500 Bid in Jan of 1980, climbed to \$8,000 by June, only to return to the \$3,500 by the end of 1982. A steady climb took it to \$6,900 by the end of 1985, only to again cycle down to \$4,000 in mid 1988. The 1989 Rally saw Bid spike at \$12,500, cycle down to \$8,000, then begin a strong rally that would carry Bid all the way to \$18,000 in August of 1990. Current Bid is \$7,000.

The Liberty Seated Quarter just might be America's favorite Type series. The collector certainly has a challenge in assembling a matched set, but it is possible. There is enough variation between the Types to make it sufficiently interesting to share with a neighbor, and the set inspires enough stories to keep your audience fascinated and amused. Between the Designers, the Engravers, the Mint Officials, and Congress, who could ask for a better cast of characters? And any set containing an Arrows & Rays coin is sure to be

This is an especially interesting set to complete for students of politics, artistic design, and Mint operations. One only has to examine the progression of artists who worked on the "Gobrecht's" design to understand just how very misleading it can be to assign a *single name* as designer. And added to the complications of modifications and additions (such as Arrows or the scrolled Motto), is the basic problem of differentiating between the Designer and the Engraver. Who deserves to get credit for a work of art? The man (or woman) who comes up with the idea, the person who executes the design, the engraver of the design, or the artisan who "touches up" the finished product? A lot of questions, but a lot of different Types to provide support for arguing any position. This is the fun of true numismatics, and this is the series for it.

Liberty Seated Quarter Types:

1838-1840: Obverse-Gobrecht, after Sully; Reverse-after Reich & Kneass (No Drapery)

1840-1853: Hughes after Gobrecht after Sully (No Motto or Extra

1853: Longacre after Hughes after Gobrecht after Sully (Arrows & Rays) 1854-1855: Longacre after Hughes after Gobrecht after Sully (Arrows, No Motto)

1856-1866: Longacre with Paquet after Hughes after Gobrecht after Sully (No Motto)

1866-1873: Longacre with Paquet after Hughes after Gobrecht after Sully (Motto; scrolled Motto by Longacre)

1873-1874: (Barber) Longacre with Paquet after Hughes after Gobrecht after Sully (Arrows; arrows by Barber)

1875-1891: (Barber) Longacre with Paquet after Hughes after Gobrecht after Sully (No Motto; New Reverse Hub by Barber phased in after 1874)

Examination of remaining Liberty Scated denominations will continue in future issues.

18 500

### VHS VIDEO TAPES

# for Love or Money

Assembling a great collection is truly a labor of love. But when given the right ingredients of time, opportunity, money, and a discerning eye, history can be made.

The Larry Shepherd Collection of U.S. Silver Commemorative Coins is just such a collection, and it is truly amazing in the quality of its coins. Spectacular is not too strong a word to use when talking about coins that have left many a numismatist speechless! David Lisot, President of Media Resource Corporation, is pleased to present a VHS videotape featuring Larry Shepherd, explaining his great love for Commemoratives, and starring his 50 piece Type Set.

Before the Shepherd Collection was encapsulated, magnificent color photographs were prepared. These form the basis for a tour through American numismatic history - through American history. If you are a collector of Commemoratives, you will know all about this collection, and will need to have this tape in your library. If you are thinking about collecting Commemoratives, this tape will inspire you. If you collect any other series, this tape will show you what can be accomplished.

The Internal Revenue Service has begun auditing coin dealers nationwide for compliance with the new cash reporting requirements (IRS Form 8300). You will be facing increased government scrutiny of your business activities, and failure to keep the records required and file all of the forms required could result in a massive fine - a minimum of \$25,000 per incident.

David Lisot, President of Media Resource Corporation, has made available their VHS videotape Currency Reporting **Alert**, featuring the presentation of Charles A. Intriago, Esq. to dealers at the Third Annual ICTA Dealer Day (March 1991, in Tampa, Florida). Mr. Intriago is an Attorney, has worked with Congress and as a Federal prosecutor, and is currently the Publisher of the Money Laundering Alert newsletter.

ICTA is leading the campaign to make the IRS regulations as reasonable as possible, and \$5 from the sale of each tape will be donated to that effort. Any dealer who thinks that this issue is not going to affect him is simply wrong...and the cost of being wrong starts at \$25,000. Wouldn't you rather invest \$33.95

Please send me the following VHS videotapes:	
copies of <i>Currency Laundering Alert</i> ; \$33.95 (\$29) copies of <i>The Larry Shepherd Collection of U.S. Sil</i> the pair for \$60 (delivered)	0.95 plus \$4 shipping and handling).  ver Commemorative Coins, \$33.95 (\$29.95 plus \$4 \$7H)

**OCTOBER - 1991** 

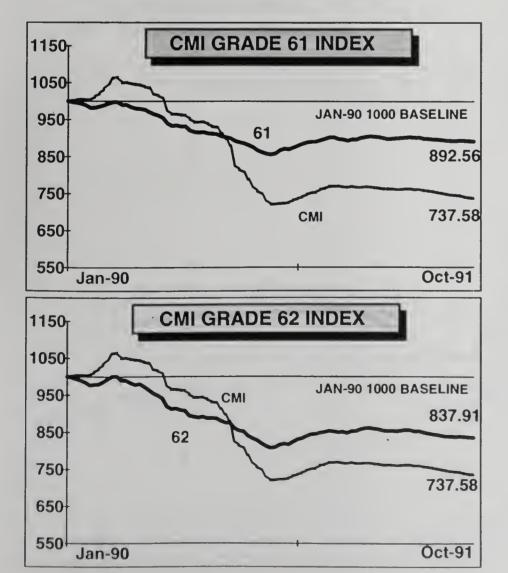

Vol. XVI No. 10

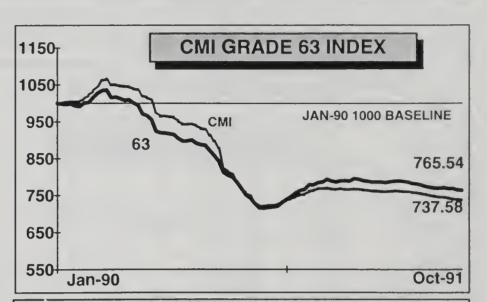

Single copy price: \$3.50

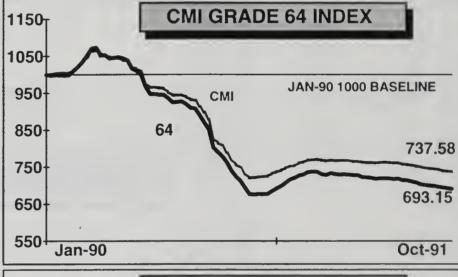

# Is Coin Purchasing All In the Grade?

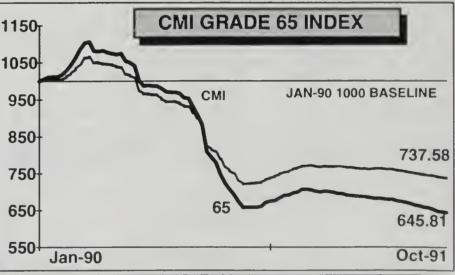

Since the beginning of 1990, the Certified Coin Dealer Newsletter ("the Bluesheet") has reported our CCDn Coin Market Index on the front page of every issue. The CMI was initially started in response to dealers' requests that they be given a simple, broad-based tool for analyzing how different series in the marketplace were performing. With over 10,000 pricing components examined every week, we feel that the broadly-based CMI is an accurate representation of the activity in the certified market. The CMI was set to equal 1000 points on January 5, 1990. While much of the news since we started has been disappointing, the numbers and charts have provided an efficient way of examining the performance of individual series relative to the overall market.

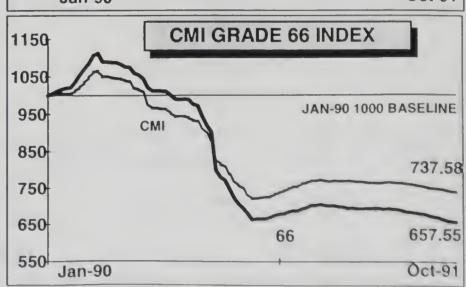

Recently, we thought that it might be instructive to look at the performance of the same group of 10,000+ coins but resorted according to grade. Accordingly, the graph for MS61 coins will compare the performance of every MS61 coin listed in the Bluesheet charts (every MS61 Morgan Dollar, every MS61 Silver Commemorative, etc.). Each grade is compared to the CMI results. On the theory that a graph is worth 10,000 words, we will let the numbers speak for themselves.

CIRCULATION & ADVERTISING—Betty Morris

The MONTHLY SUPPLEMENT and Complete Series Pricing Guide is a supplement to the weekly COIN DEALER Newsletter [Greysheet]; both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to huy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

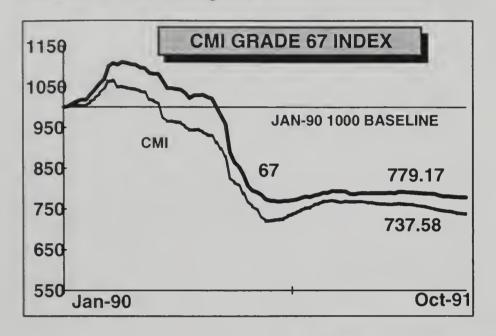

Subscription Information: The Monthly Supplement and Complete Series Pricing Guide is mailed each month to subscribers of the weekly COIN DEALER NEWSLETTER at no extra charge! The Monthly Supplement is not a recap of the weekly CDN; it is supplementary information. A Subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax).

Address all subscription remittances to:

### Is Coin Purchasing All In the Grade? (continued)

The final graph is a composite of the previous seven grade graphs, and more fully illustrates the point hinted at in each of the individual graphs. While the market was rising in early 1990, the MS64-MS66 graded material was outperforming the CMI; in the down market, the MS64-MS66 graded material has been substantially underperforming the CMI. The MS67 material has maintained its level better than any of the other high grades, but that is due in part to a lack of recorded trades that would tend to drive prices downward.

In summary, the collector who purchased MS61 coinage got the most collection for his dollars, and has lost the least amount of money. The collector who invested in MS67 coinage received the fewest coins for his dollars, but has the satisfaction of outperforming the most commonly touted investment grades.

### VHS VIDEO TAPES

# for Love or Money

Assembling a great collection is truly a labor of love. But when given the right ingredients of time, opportunity, money, and a discerning eye, history can be made.

The Larry Shepherd Collection of U.S. Silver Commemorative Coins is just such a collection, and it is truly amazing in the quality of its coins. Spectacular is not too strong a word to use when talking about coins that have left many a numismatist speechless! David Lisot, President of Media Resource Corporation, is pleased to present a VHS videotape featuring Larry Shepherd, explaining his great love for Commemoratives, and starring his 50 piece Type Set.

Before the Shepherd Collection was encapsulated, magnificent color photographs were prepared. These form the basis for a tour through American numismatic history - through American history. If you are a collector of Commemoratives, you will know all about this collection, and will need to have this tape in your library. If you are thinking about collecting Commemoratives, this tape will inspire you. If you collect any other series, this tape will show you what can be accomplished.

The Internal Revenue Service has begun auditing coin dealers nationwide for compliance with the new cash reporting requirements (IRS Form 8300). You will be facing increased government scrutiny of your business activities, and failure to keep the records required and file all of the forms required could result in a massive fine - a *minimum* of \$25,000 per *incident*.

David Lisot, President of Media Resource Corporation, has made available their VHS videotape **Currency Reporting Alert**, featuring the presentation of Charles A. Intriago, Esq. to dealers at the Third Annual ICTA Dealer Day (March 1991, in Tampa, Florida). Mr. Intriago is an Attorney, has worked with Congress and as a Federal prosecutor, and is currently the Publisher of the *Money Laundering Alert* newsletter.

ICTA is leading the campaign to make the IRS regulations as reasonable as possible, and \$5 from the sale of each tape will be donated to that effort. Any dealer who thinks that this issue is not going to affect him is simply wrong...and the cost of being wrong starts at \$25,000. Wouldn't you rather invest \$33.95 now?

Please send me the following VHS videotapes:

# MONTHLY SUPPLEMENT AND COMPLETE SERIES PRICING GUIDE

# **NOVEMBER - 1991**

Vol. XVI No. 11 Single copy price: \$3.50

# An Evaluation of the Current Silver Commemorative Market Part I

by Anthony Swiatek

During the market highs of 1989 & 1990, a number of collectors of U.S. Commemorative Coinage expressed complaints about the lofty prices (to which neither they nor the dealers were accustomed!). "I would love to acquire an MS65 Stone Mountain, but its **Bluesheet** (*CCDN*) Bid is \$750+!" What is the current Bid for this coin? At around \$184, the opportunity to procure a superb specimen for the *joy of collecting* is perfect. Are the collectors lining up to buy? And for the collector-investor, are these coins good acquisitions? This study offers insight into the current status of each Silver Commemorative issue, including grading ranges and possible future potential. All comments regarding potential are the opinion of this author, and are based on 20+ years specializing in Commemorative Coinage. Every issue is listed with the net mintage in parentheses (including assay pieces).

1893 ISABELLA 25 € (24,214) Our first and only Commemorative quarter-dollar. Current prices in XF-AU through MS64 (\$175-\$2,400) reflect the promotional hype inspired by radio ads and telemarketers, etc. As long as these campaigns are effective, values will rise or remain at these levels; when the puffery ceases, the party could be over. Population counts in MS64 (and to some degree MS65) are inflated, due to resubmissions in the hope of an upgrade (and accompanying large profit). Presently, eye-appealing MS65 and MS66 specimens are somewhat undervalued. Who wouldn't want to own a lovely MS67 specimen? For the time being, let us say that this popular creation should only be purchased for the joy of collecting.

1900 LAFAYETTE \$1 (36,026) Underpriced in all MS grades, especially MS63 and higher. MS64 populations are 'fattened' by resubmissions, as are the MS65 coins (to a lesser degree). MS64+ and higher coins offer excellent future potential.

ALABAMA 2x2 (6,006) Also undervalued in all MS categories. High census figures in MS63 and MS64 are the result of many resubmissions in the hope of a one-grade increase. MS64 and higher graded coins offer excellent future potential.

ALABAMA Plain (59,038) In my opinion, the 'plain' variety in MS65 holds the edge in rarity for this issue. Otherwise, ditto the above.

ALBANY (17,671) Price spread between XF-AU and MS64 is little; an MS64+ flashy specimen should be your starting point for an acquisition. Based on population figures, current Bid levels seem fairly valued. However, when the bull market returns, expect this issue to be promoted in MS65 and up.

ANTIETAM (18,028) This Civil War Commemorative has seen little numismatic abuse. Current price spread between XF-AU and MS64 is little (\$340-\$390 Bid); value between MS64 and MS65 condition is not that great (\$390-\$450 Bid). Issue is higher in value in XF-AU condition than the Albany, since the latter has encountered more numismatic abuse (especially via whizzing on the obverse beaver, since the high point or first area to show wear is almost as high as the silver disk's rim). Would acquire in no less than MS64+ condition. Issue appears to be fairly priced at current levels. Should any future promotion occur, expect the MS65 and MS66 categories to be promoted. Without promotion, expect the MS66 to decline in value, as its population count is a bit too high. Based on the census, this Commemorative should not be difficult to obtain in the future.

ARKANSAS TYPE Little price differential exists from your XF-AU through MS64 grades. Population figures are low up to grade MS62, due to the coins' lesser value and slabbing fees. Based on same census, there exists enough MS63 and MS64 coins to justify current levels. Would concentrate on flashy or eye-appealing MS64 + coinage which is undervalued, instead of those somewhat flat or darkly colored encapsulations. However, at current levels, an eye-appealing MS65 coin is underpriced, as is the solid MS66 specimen. Exceptional future performer, especially coins dated 36-P, 36-S through 39-S.

1935 ARKANSAS SET Eye-appealing P (13,012), D (5,505), and S (5,506) coins which make up this set will not be that easily located in MS65 condition. Eye-appeal is the key concept. Sets can be acquired, but their appeal can be questioned. Most offerings of type pieces appear from this date.

1936 ARKANSAS SET Ditto as far as availability is concerned in grades MS64 and MS65. Prefer this P (9,660), D (9,660) and S (9,662) set over the 1935 strikings unless more eye-appealing. At \$900 Bid, set is way undervalued. Wonderful future potential.

1937 ARKANSAS SET Availability is somewhat less in grades MS63 and MS64. Real future potential lies in coins graded MS65 and better. The 1937-S issue (5,506) followed by the '37-P (5,505) are your sleeper type coins in MS65 condition. The Denver production (5,505), if appealing, will perform well. Current price level for this set is a joke.

1938 ARKANSAS SET Few coins dated 1938 P (3,156), D (3,155) and S (3,156) were slabbed MS60 through MS62. Difficulties will be encountered by the procur-

ers. Eye-appealing MS63 and MS64 pieces will not be readily available. Underpriced at current levels. Highly undervalued is the set grading MS65 and better. Fantastic future potential.

1939 ARKANSAS SET Undervalued in all grades from MS60 through MS64 Tremendous potential in grades MS65 and higher. Remember, eye-appeal is very important when purchasing this key P (2,104), D (2,104) and S (2,105) low-mintage issue.

1936 BAY BRIDGE (71,424) Fairly priced in all grades up to MS65 condition. Over the past two years, many of these "bears" have made their appearance along the Commem trail. When the market once again heats up, expect this coin's value to rise, especially in MS65 and MS66 condition. Past highs will be used as a promotional tool.

1934 BOONE (10,007) Price differential between XF-AU quality and MS64 condition is little (\$65-\$85 BID). Collectors should go with the slabbed MS64 coin whose value is too low. Also somewhat undervalued at current levels is the MS65 specimen. MS66 pieces are definitely a great buy in today's market.

1935/34 BOONE SET The Philadelphia striking (10,008) bearing the added date "1934" above the word PIONEER is not a rare coin, and is worth type coin money. Somewhat undervalued in MS64 and MS65 condition, and certainly worth more than present MS66 Bid values. Our San Francisco coin (2,004) is somewhat rarer than its Denver (2,003) counterpart in MS65 condition. These popular low mintage coins are desired by collectors and investors in all grades and are undervalued at present levels. Few if any saw circulation; cleaned coins (or those abused in some way) are usually offered at MS60 prices or slightly less. Should demand for the set (or the two lowest mintage Commems ever produced for our nation) become steady, prices will rise quickly. Much of this issue is well distributed.

1935 BOONE SET Little price spread exists in MS60 through MS64 grades (\$210-\$255 Bid) currently. The trio has divergent mintages, with P (10,010), D (5,005), and S (5,005). At these levels, the collector should consider no less than MS64 or MS64+ specimens. Elusive date in the group is the Denver specimen. Slightly undervalued as a set in MS64 and MS65 grades. MS66 coinage offers the best potential, as this set is a prime candidate for future promotions.

1936 BOONE SET Value levels in grades MS60 through MS65 (\$210-\$450) can be labelled fair for this P (12,012), D (5,005) and S (5,006) group. Is not too difficult to locate at present. With the MS64 Bid snoozing at \$255, suggest that collectors presently focus on the higher grade when possible. Prices will rise when the bull market arrives once again, in MS64 and especially MS65. Great future in the higher grades.

1937 BOONE SET Undervalued in all grades at this moment. Your Philadelphia striking (9,810) is not the rare coin of the grouping; it is worth type coin values. It's those identical low mintage Denver and San Francisco creations (2,506) which make the set attractive. Population figures are somewhat inflated in grades MS64 and MS65. Excellent future potential exists in the MS64 and higher grades.

1938 BOONE SET In this last year of issue, each facility flaunts a mintage figure of 2,100! Somewhat underpriced at this time in all grades. Census figures are a bit puffy in MS64 and MS65. Future looks bright in the MS64 and loftier categories.

1936 BRIDGEPORT (25,015) The majority of this issue exists in MS61 through MS64 condition. Fairly priced and bounteous at existing levels. Suggest acquiring an eye-appealing MS64+ coin when possible for the joy of collecting. Strictly graded MS65 pieces are worth more than present values, especially those grading MS66. Find it difficult at times to agree with those PTBs labelled MS65, especially when examining his portrait for negatives.

1925-S CALIFORNIA JUBILEE (86,394) Fairly priced in grades XF-AU through MS63. Nice looking MS64+, MS65 and MS66 labelled encapsulations are undervalued at today's levels. Believe that population reports are inflated due to resubmissions in these higher grades. Expect this popular issue to perform well in the next bull market.

1936 CINCINNATI SET Little price difference exists between the D Mint type coin (5,005) in grades XF-AU through MS64 or when the trio is offered as a complete PDS. Recommend zeroing in on an eye-appealing MS64 specimen when available. At current levels, strictly graded MS65 pieces - and not the optimistically labelled ones - are certainly quite undervalued. King of the road is the low census S-Mint (5,006) followed by the P-Mint striking (5,005). Exceptional future potential in this grade and higher.

1936 CLEVELAND (50,030) Past price increases were responsible for those vast numbers of Clevelands which have entered the marketplace. Available in all grades from XF-AU through MS64. Basically worth current levels, and fairly priced in MS65 condition, although attractive MS65 + coins are worth more "Raw" or "Green". Should perform well in the next hot market, along with MS66 encapsulations.

1936 COLUMBIA S.C. SET Price differential between the XF AU through MS65 set, as well as the type coin value, is minimal. Fairly even mintages with P.

#### An Evaluation of the Current Silver Commemorative Market (continued)

(9,007), D (8,009) and S (8,007). See these grades as fairly priced. Suggest thinking MS65 when purchasing, if possible. Expect this grade to be affected by future promotion. MS66 is definitely undervalued. Should perform well during the next bull market. The lofty grades appear to be the ones to possess, if future gains are your only concern

1892 COLUMBIAN (950,000) Appears to be fully priced at present, in grades up to MS65, due to current promotion of the issue. Should this continue and the market begin to warm up, so can the prices in each grade category continue to rise for both dates

1893 COLUMBIAN (1,550,405) Also looks fully priced in grades up to MS64 due to said promotion. In MS65 condition, this higher mintage issue is close to being twice as rare as its 1892 counterpart. Bids are higher for the '92 issue because it is easier to locate and thus helps make a sale - by being more available.

1935 CONNECTICUT (25,018) There exists an insignificant (but fair) price spread between MS60 and MS64 graded coins (\$140-\$230 Bid). Collectors should go for the higher MS64 grade if possible, which is undervalued. Suggest flashy MS64+ acquisitions. Population counts are rather inaccurate, due to resubmission of MS64 and MS65 pieces in the hopes of receiving the next higher grade. Strictly graded MS65 and higher encapsulations of this popular design should do well in the next

1936 DELAWARE (20,993) Little price spread exists between coins grading XF-AU through MS64 (\$165-\$220 Bid). Again collectors should concentrate on attractive MS64 pieces when funds permit. Values are realistic at current levels for all said grades. Due to resubmissions, census figures are inflated in the MS64 and MS65 categories. Some liberal grading also affects the latter grade. Good potential in MS65 and better condition.

1936 ELGIN (20,015) Not much spread between XF-AU and MS64 values (\$140-\$180 Bid). Issue now appears to be around in grades MS63 though MS65. Population figures have risen rapidly, especially in grades MS64 and MS65. Seems that the issue is now comparatively priced at current levels, with fair future upside potential. Needless to say, the census figures for the latter two grades are inflated. MS66 prices could decline insignificantly, but this appears to be the grade with any real future potential. Will MS65 specimens attain previous highs of \$1,550+? Promoters during the next hot market will have you believe it.

1936 GETTYSBURG (26,928) Inconsiderable price difference between XF-AU and MS64 graded specimens (\$160-\$220 Bid). For that reason, suggest MS64 acquisition instead of lesser grades. Should market conditions remain unchanged, expect a small decline in MS65 prices. This issue is rarer than current levels indicate due to resubmissions in the MS64 and MS65 categories. This coin is popular and should possess good future potential in MS64 and higher.

1922 GRANT WITH STAR (4,256) An extremely popular collector coin which is undervalued in all grades from XF-AU (undoctored) to MS66 (if the latter can be procured). Excellent future potential when the market "green" begins to make a steady appearance.

1922 GRANT (NO STAR) (67,405) Mintage wise, this issue is almost sixteen times more abundant than the rarer star variety, and can be obtained with little difficulty in grades XF-AU through MS63. Population figures are swollen due to resubmissions in the MS64 and MS65 categories. When the Jacksons, Franklins and Grants begin making their presence felt in the marketplace, especially watch the higher grade Grant issues (MS65 and better) rise to the occasion! They are certainly undervalued in today's world of numismatic activity.

1928 HAWAIIAN (9,958) Favored collector issue is fairly priced in grades XF-AU (undoctored) through MS62 at present (\$550-\$960 Bid). Census figures in grades MS63 through MS65 are enlarged due to past resubmissions (courtesy of the large price variance between grades). It has good future possibilities in MS64 condition and one excellent mass of potential in grades MS65 and higher.

1935 HUDSON (10,008) A preferred collector issue that is fairly priced from XF AU [undoctored] through MS63 condition (\$310-\$450 Bid). Needless to say, our MS64 category flaunts an inflated census figure, as does the MS63 coin (but to a le ser degree thinks to resubmissions. Quality eye-appealing MS65 specimens are r t th t early located Higher graded coins are very difficult to obtain properly graded Take the issue in grades MS64 and higher for future appreciation.

1924 HI GI ENOT WALLOON (142,080) Little spread exists between XF-At a factored and M. 63 courage (\$60.\$95 Bid). It's fairly priced and available at the Certain figure in MS64 and to a lesser degree in MS65) are inflated due tor and an Expect value for MS65 and MS66 pieces to decline somewhat have a property rick to an lition. However, when the market heat returns, ag the formulation in worth

1946 IOWA (100,057) One of the most available issues in the XF-AU state of preservation (which is still not too often encountered, unless abused in some manner) right up through the MS66 condition (\$65-\$185 Bid!). Thus, little price spread exists here. Think at least MS66 when procuring. Expect MS67 category to slip some in value over the next few months. When the bull arrives, the latter two will be the states which can increase in value.

1925 LEXINGTON (161,914) Issue which was not as angelically protected as the lowa Centennial creation in higher grades, but can still be easily located and is fairly priced in XF-AU through MS64 condition (\$47-\$170 Bid). Flashy MS64+ pieces are very desirable and will command a premium, as they are undervalued. The latter's population count is moderately puffy. Great coin to have in one's collection grading MS65 and higher. Quite underrated. Definite winner when the next market boom arrives.

1918 LINCOLN (100,058) Popular collector coin flaunts little price spread between its plentiful XF grade through MS64 (\$55-\$130 Bid). Current levels are fairly priced. Key is to obtain flashy MS64+ pieces at a moderate premium over current levels. Here is where the future potential lies for the condition. MS65 specimens are undervalued, at present. Cracking-out coins from their holders with the great expectation of a higher grade has created more slabbed MS65 specimens than actually exist. Like the coins in grades MS64+ and higher.

1936 LONG ISLAND (81,826) No real price spread exists between this silver disk's plentiful XF-AU grade and MS64 (\$50-\$85 Bid). Current values are fairly priced for these grades. Collectors should attempt a flashy acquisition in the MS64+ grades. Our next bull market will have a moderate effect on the latter due to its availability. MS65 and higher (properly evaluated) grades will be the winners.

1936 LYNCHBURG (20,013) Insignificant price variance presently exists between XF-AU coinage (which is often encountered cleaned, lightly polished, or abused in some fashion - since few were used as pocket pieces) through MS64 condition (\$130-\$200 Bid). Prices appear to be fairly valued at present, although the MS64 and MS65 specimens could lose some ground within the next few months. Required for a price increase in MS65 condition would be a jolt of electricity, generated by a new flow of Franklins. When such occurs, MS66 Lynchburgs will also light up our numismatic sky.

1920 MAINE (50,028) A popular early collector coin which is fairly priced in grades XF-AU (plentiful) through MS63 + (\$60-\$130 Bid). It is somewhat underpriced in MS64 condition. Census count here is definitely inflated, due to crack-outs. Same holds true for the MS65 graded coin, but to a lesser degree. When the next boom market becomes a reality, expect this issue (especially in the MS65 and higher grades) to make its presence known. Explicitly undervalued.

1934 MARYLAND (25,015) Little price difference exists between XF-AU coinage (which usually reflects those cleaned or abused pieces) up through grades MS64 (\$100-\$190 Bid). As with most issues where past price spreads between MS64 and MS65 were considerable, the population count (via crack-outs and higher grade expectations) becomes more numerous. Such is definitely the case with this Commemorative half-dollar. Despite its design (which has been subject to some criticism), it is fairly priced at current levels in MS64 condition. Passably undervalued in MS65 and MS66 condition at present.

1921 MISSOURI 2\*4 (5,000) One of my favorite issues which is underpriced in all Mint States! Excellent future potential here, when the marketplace heats up. Needless to say, the MS63 and MS64 populations are overblown. Why? Higher values between grades were just too enticing; thus, the "crack-out addicts" went to work. They destroyed, in many cases, the grading identification labels, which if returned, could have been used to delete the item from the census.

1921 MISSOURI (15,428) While the mintage of this issue is three times as great as the 2°4 variety, the plain variety is equally as rare (or a smidgen rarer) in MS64 and MS65 condition. Undervalued in all Mint States means an excellent future potential for this popular issue.

1923-S MONROE (274,077) One of the five most abundant issues in circulated and MS60 condition. Easily located and fairly priced in grades through MS63 (\$26-\$85 Bid). Population figures for the MS64 category are somewhat inflated, due to resubmissions motivated by the large spread between MS64 and MS65 grades. Absolutely underrated at current levels in MS64 and better condition, when the bull arrives, prices will rise.

1938 NEW ROCHELLE (15,266) Little price spread exists between XF AU (which usually reflects the cleaned or doctored coin, since few reached circulation) and MS64 condition (\$230-\$280 Bid). If possible, focus on the MS64 compossessing eye appeal. Moderately priced in MS63 thru MS64 condition at present. Strictly graded specimens are definitely undervalued in MS65 and MS66 condition. Very good future potential

Anthony Swiatek P.O. Box 218, Manhasset, N.Y. 11030 (516) 365-4120

#### VHS VIDEO TAPES

# for Love or Money

Assembling a great collection is truly a labor of love. But when given the right ingredients of time, opportunity, money, and a discerning eye, history can be made.

The Larry Shepherd Collection of U.S. Silver Commemorative Coins is just such a collection, and it is truly amazing in the quality of its coins. Spectacular is not too strong a word to use when talking about coins that have left many a numismatist speechless! David Lisot, President of Media Resource Corporation, is pleased to present a VHS videotape featuring Larry Shepherd, explaining his great love for Commemoratives, and starring his 50 piece Type Set.

Before the Shepherd Collection was encapsulated, magnificent color photographs were prepared. These form the basis for a tour through American numismatic history - through American bistory. If you are a collector of Commemoratives, you will know all about this collection, and will need to have this tape. in your library. If you are thinking about collecting Commemoratives, this tape will inspire you. If you collect any other series, this tape will show you what can be accomplished.

The Internal Revenue Service has begun auditing coin dealers nationwide for compliance with the new cash reporting requirements (IRS Form 8300). You will be facing increased government scrutiny of your business activities, and failure to keep the records required and file all of the forms required could result in a massive fine - a minimum of \$25,000 per incident.

David Lisot, President of Media Resource Corporation, has made available their VHS videotape Currency Reporting **Alert**, featuring the presentation of Charles A. Intriago, Esq. to dealers at the Third Annual ICTA Dealer Day (March 1991, in Tampa, Florida). Mr. Intriago is an Attorney, has worked with Congress and as a Federal prosecutor, and is currently the Publisher of the Money Laundering Alert newsletter.

ICTA is leading the campaign to make the IRS regulations as reasonable as possible, and \$5 from the sale of each tape will be donated to that effort. Any dealer who thinks that this issue is not going to affect him is simply wrong...and the cost of being wrong starts at \$25,000. Wouldn't you rather invest \$33.95 now?

Please send me the following VHS videotapes:	
copies of <i>Currency Laundering Alert</i> ; \$33.95 (\$29.95 plus \$4 sh copies of <i>The Larry Shepherd Collection of U.S. Silver Commemo</i> the pair for \$60 (delivered)

# **DECEMBER - 1991**

Vol. XVI No. 12

Single copy price: \$3.50

# An Evaluation of the Current Silver Commemorative Market—Part II

by Anthony Swiatek

1936 NORFOLK (16,936) This issue (as is the Iowa) appears to have been protected (in the higher grades) by a guardian angel. There exists such an insignificant price spread between XF-AU and MS65 grades (\$350-\$420 Bid) that one considering a purchase should think a minimum of MS65. In fact, MS66 coins only rate a \$480 Bid! While the MS65 census figure can be labelled 'expanded', you can bet the 66 count is also quite inflated. Same for the MS67 population tally. Sizeable price differences between these grades in the past had the crack-out hopefuls working overtime. Would say the issue is presently undervalued only in MS67 condition. As with the Iowa Centennial, this coin must also be labelled common. Certainly punctures or confutes the uninformed belief that if a mintage (when struck, counted and bagged) is smallish, that the number of gem coins will also be limited. Compare the census of the Norfolk (in MS66 and MS67) with the Columbian issues and their combined 2.5 million mintage. Respectively, the ratios are approximately 100 to 56 in MS66 and 275 to 1 in MS67. WOW, you say! This is the result of excessive numismatic abuse - and the lack of angelic protection.

1926-P OREGON TRAIL (47,955) By far the most popular U.S. Commemorative coin struck. As such, it is fairly priced in XF-AU condition, as the issue can be located without much difficulty at present. No large price variance exists between MS60 and MS64 grades (\$70-\$135 Bid). If funds permit, think MS64 which is fairly valued. When an Oregon is a super-flashy MS64+ specimen, more "green" will be required for its acquisition. Price is usually contingent upon the coin's makeup, meaning its eye-appeal, luster, color and strike. Issue is surely underpriced in MS65 condition. Ignore that mintage figure, since it received excessive abuse. Population figures are dilated. It's unequivocally cheap in MS66 and MS67 condition. Excellent future for this Philadelphia creation which is usually not seen as flashy as the 1926-S production. Any coin in the series can be used as a type coin, but most collectors in the past either chose or were offered the least expensive '26-S or '37-D coins.

1926-S OREGON TRAIL (83,055) This San Francisco striking is fairly priced in XF-AU through MS63 condition (\$70-\$110 Bid), and a bit undervalued in MS64 (unless the coin is an exceptional 'almost made it to MS65' specimen; then, it is worth more dollars). In grades MS65 and higher it is undervalued. Population figures are puffy. Like this date when it evaluates MS65 and higher. Very good future potential here for a creation which can be the flashiest struck for the series.

1928-P OREGON TRAIL (6,028) This low-initiage issue is certainly undervalued in XF-AU condition (which will not be found in abundance) through MS64. Our MS64 population figures are certainly inflated, due to substantial past price differences between MS64 and MS65 coins; at one instance, the spread was \$1,000! Although the mintage is almost eight times smaller than the 1926-P production, it is positively rarer in MS65 condition, but less rare in MS66. Excellent future for this coin.

1933-D OREGON TRAIL (5,008) Flashy popular date which is undervalued in all grades. Resubmissions account for population inflation in the MS64 and MS65 grades. Excellent future potential in MS64 and above.

1934-D OREGON TRAIL (7,006) While consistently not as flashy in appearance as the '33-D, this production is moderately undervalued in all grades up to MS64. Census in the MS64 and MS65 categories has swelled due to past price levels and the crack-out addicts hope of a higher encapsulation. Anticipated gains when the bull market arrives will become a reality, especially for the strictly graded, lofty Mint State coinage.

1936-P OREGON TRAIL (10,006) If collectors were asked to list their seven favorite dates and mint-marked specimens struck between 1926 and 1939, this Philadelphia creation would not be listed. As an individual issue, it is low-priced in all grades. Population count is also overblown, due to reslabbing in anticipation of the next highest grade. Will perform in an excellent manner when once again, our sun rises high above the numismatic horizon.

1936-S OREGON TRAIL (5,006) A very popular date which is cheap in all grades at current levels. Census in MS65 and MS66 are somewhat blown up. Very good future potential for this Oregon Trail creation.

1937-D OREGON TRAIL (12,008) A flashy, available date which possesses virtually all that one could demand from the issue. Little price spread exists between the XF-AU and MS64 specimen (\$80-\$145 Bid). Crack-out inflation and great expectations affects the population figures in grades MS65, MS66, and to a lesser degree, MS67. Undervalued in MS65 and better at present, with decent future potential. Suggest selecting a different date for a type specimen, such as 1926-P, 1928-P, 1933-D, 1934-D, 1936-S, 1938-P, or any 1939 in MS65 condition. Think the latter, especially in MS64 grade.

1938 OREGON TRAIL SET Little price spread exists between sets graded MS60 through MS64. Somewhat underpriced here, as well as in MS65 condition. Acquisition of an eye-appealing set should be one's goal, since much of the issue lacks real flash. Here is where the future resides. When considering a type coin acquisition, the MS65 P-mint (6,006) is more or less rarer than the D-mint (6,005) or S-mint (6,006). However, when contemplating an MS66 acquisition, think Philadelphia rather than San Francisco; the Denver striking is more abundant than the others.

1939 OREGON TRAIL SET Little price difference exists for this low mintage P (3,004), D (3,004) and S (3,005) set in grades MS60 through MS64 (\$1 090 \$1,350 Bid) Set is especially desired by collectors. If funds permit, think at least MS64 should future gains be pondered. Definitely underpriced in all grades. Certain next bull-market winner, especially in the MS64 and higher categories. Coins produced by each mint are about equally rare in MS64 and MS65. Slab populations in these grades were not immune to inflation due to the crack-out artists. Philadelphia and San Francisco specimens labeled MS66 are about equally as rare. Our Denver creation is the more plenteous of these mintmarks. This is an issue which will climb when the good times arrive.

1915-S PANAMA PACIFIC (27,134) One of my tavorite designs which is undervalued in all grades, including your XF-AU class (provided the coin has not been whizzed, polished, or doctored in some fashion) Census totals are misrepresented at the MS63 through MS65 levels due to resubmissions. This Barber-Morgan creation will shine brightly in the numismatic sky, with the arrival of market prosperity, in all grades, especially in MS64 and better condition.

1920 PILGRIM (152,112) An insignificant price spread exists between specimens labelled XF-AU (which are easily located at present) through MS63 state (\$47-\$61 Bid). Fairly valued in circ on up to the MS62 level. Undervalued to some degree in MS63 and MS64 condition. Market price for specimens grading MS65 is too low. Inflated population figures here. A wonderful numismatic item to possess in MS65 and above when the bull finally arrives.

1921 PILGRIM (20,053) The Commemorative half-dollar that originally introduced me to this wonderful series, is undervalued in all grades at present. Definite sleeper in the MS65 and higher spheres. Census tally is unnaturally enlarged in the MS64 and higher-priced MS65 categories. Great future for this issue, especially when "Ursus horribilis" finally departs and the welcome bovine arrives.

1936 RHODE ISLAND SET There exists almost no price difference between a single type coin grading XF-AU through MS64 (\$68-\$180 Bid), nor the complete P (20,013), D (15,010) and S (15,011) set grading MS60 through MS64 (\$210-\$255 Bid). Based on the availability of the aforesaid, acquisition in MS64 seems most logical. Why not procure the highest grade when the monetary difference is so small? Our Philadelphia and Denver creations are absolutely underpriced in MS65 and higher quality, while the San Francisco striking is rarer by a two to one margin. Wonderful future here, particularly for the California coinage.

1937 ROANOKE (29,030) Fairly valued at present, in all grades labelled XF-AU through MS66 (\$145-\$515 Bid). Census possesses definite inflation in MS64, MS65 and MS66 grades, but the coin is best considered 'available'. Think a minimum of MS65 if procuring for the joy of collecting; otherwise, it should be MS66 or pass. The issue is just that available. Those who can afford the MS67 piece should consider its purchase.

1936 ROBINSON (25,265) Quite available in all grades and fairly priced from MS60 through MS64 condition (\$80-\$140 Bid). When contemplating purchase, think only flashy MS64+ material. Coin is just that abundant. Specimens grading MS65 are certainly underpriced. Its population count is a bit puffy. Definite future winner here only in the MS65 and higher grades, and if strictly graded.

1935-S SAN DIEGO (70,132) and 1936-D (30,092) Our California-Pacific Exposition coins are among the prettiest issues and easiest to locate in grades XF-AU through MS65 (\$55-\$115 Bid; \$65-\$125 Bid) They are also fairly priced in their respective grades, except for the Denver coin in MS64, which is a bit underpriced. Too many pieces have entered the marketplace over the last several years, strikings will apodictically never reach past highs. For the joy of collecting, think MS65. Would only consider the MS67 category for the San Francisco coinage, and MS66 and above for the lower mintage '36-D. Any real future potential lies in these grades.

1926 SESQUICENTENNIAL OF AMERICAN INDEPENDENCE (141,120) Fairly priced and available in grades XF-AU through MS63 (\$53 \$120 Bid). Current MS64 population is inflated due to resubmissions. Pricing is definitely too low for those flashy MS64 specimens (but not for the unappealing coin) Great coin to possess MS65 and higher when available for those who can afford the issue provided the coin is not optimistically graded or unattractive Wonderful future potential

1935 OLD SPANISH TRAIL (10,008) This very popular collector design is fairly priced in grades XF-AU through MS63 (\$500-\$625 Bid) MS64 and MS65 grades are a bit undervalued at current levels (\$650 and \$835 Bid). Census count for these two classifications are moderately inflated. Future potential lies in the MS65 and higher grades for this favored issue.

1925 STONE MOUNTAIN (1,314,709) Fairly priced and readily available in grades XF-AU through MS65 (\$29-\$180 Bid). Original rolls still reside in southern bank vaults; I know of one estate that possesses 17 rolls (340 pieces!) They may remain there for another sixty-six years; who knows? Thirty months ago, during the last near market high (5/28/89), the issue would have cost you \$750+ Current Bid is only \$180! For those who complained about the price, now is your chance to buy right. However, any tuture potential lies in the MS66 and better class. Just be certain that Lee, Jackson and their horses do not display too many contact marks for the grade

1934-P TEXAS (61,463) One of my favorite designs exhibits little price spread between XF-AU and MS65 condition (\$75-\$140 Bid). It's that procurable. It tunds are available, collectors should zero in on a flashy MS65 specimen. Quite inexpensive in MS66 and higher condition; here is where the future lies. Regarding type material for

#### An Evaluation of the Current Silver Commemorative Market (continued)

the entire 1934-1938 striking (for many dates and mintmarks, in grades MS60 through MSool be aware that it is fairly priced and available at present.

1935 TEXAS SET This group, consisting of specimens produced at the mints in Philadelphia (9,996) Denver (10,007) and San Francisco (10,008), can be obtained with little ditticulty in grades MS60 through MS65 (\$240-\$420 Bid). Set is often broken up with individual pieces used as type coins (the 1934 issue is also used as a type as well). In MSo5 condition, the San Francisco production is somewhat rarer. Your Colorado coin is usually the flashiest in MS64 and better Mint States, when accompanied by its semiprooflike obverse Future looks bright for the S mint coin in MS66 and especially MS67 condition Think at least MS66 and specifically MS67 when future returns are the primary objective

1936 TEXAS SET. These somewhat lower-mintage P [8,911], D [9,039] and S (9,055) mint strikings can also be obtained with little difficulty in grades MS60 through MS65 (\$240-\$420 Bid). Practically equal in rarity in grades MS65 and below. Excellent tuture potential here for your San Francisco and Philly coinage, in MS66 and especially

1937 TEXAS SET While the tally figures from the P (6,571) D (6,605) and S (6,637) mints are much lower than the production of the previous years, this set can presently be obtained with little difficulty in grades MS60 through MS65 (\$300-\$420). It is undervalued in flashy MS64 and better condition. Especially like the Philadelphia coin in MS66 category, as well as the set. Great acquisition in MS67; unfortunately, none exist. Bid is \$6,000.

1938 TEXAS SET Imagine having a three coin set produced today, with Philly striking only 3,780 coins, Denver only 3,775, and San Francisco only 3,814. There exists no large price spread between the MS60 and MS64 categories (\$450-\$675 Bid). Therefore, if funds are available, think at least MS64. Underpriced when eye-appealing and accurately evaluated, in all grades. Excellent future potential in MS64 and better

1925 FT. VANCOUVER (14,994) Popular low-mintage issue is fairly priced in grades MS60 through MS62 (\$210-\$220 Bid). Somewhat undervalued in MS63 through MS65 Population figures are definitely inflated in the MS64 and MS65 counts, due to resubmissions and roseate expectations. While past dollar highs might be history because of population increases, the future here appears most promising in MS65 and

1927 VERMONT (28,142) Another popular collector coin which is presently fairly priced and available in grades XF-AU through MS64 (\$118-\$300 Bid). Future potential (which can be labelled 'top-notch') resides in those attractive specimens grading MS65 and higher mint states.

1946 BOOKER T. WASHINGTON SET Not too many collectors care about this set because it is so abundant. Philadelphia originally produced 1,000,546 pieces, of which approximately half may have been melted. Denver struck 200,113 coins, while San Francisco minted 500,279 coins. Fully priced in grades XF-AU through MS63. Future potential resides only in MS66 and MS67 pieces, unless the price of bullion silver skyrockets for lower-grade pieces

1947 BOOKER T. WASHINGTON SET All three mints produced identical mintages (100,017) in this year. Underpriced at present, in all grades. Focus should be on the 1947-P and D mint coins in MS65 condition. Current MS66 Bid is problematic, as the coins don't exist (could use fifty sets right now!). Super sleeper. Only two complete sets of MS67 can be assembled!

1948 BOOKER T. WASHINGTON SET Each mint produced 8,005 specimens for date Based on the insignificant demand at present for this issue, would proclaim it fairly priced in grades MS60 through MS64 (\$72-\$120 Bid) and more or less undervalued in MS65. Certainly fully priced in MS66 (\$4,000). To date, no sets have been slabbed MS67. Bid for this phantasm is \$6,000 when slabbed by the major services.

1949 BOOKER T. WASHINGTON SET The same production figures (6,004) were generated by each government facility · once again. In the past, the 1949 set was considered king of the series, based on its mintage figures. Its mystique has been shattered The higher mintage - but more abused - 1947 set now occupies the throne. Would say it is presently fully-valued in MS60 through MS65 condition (\$170-\$400 Bid) and indervalued in the MS66 state. The Philadelphia and Denver coins are rarer than the on Francisco pieces. As none currently exists in MS67, we can label that set

1950 BOOKER T. WASHINGTON SET Philadelphia and Denver each struck \* 1994 Commemoratives while San Francisco went on a 512,091 roll. However, due to multiliable of the latter the lower mintage issues are only a bit more than w are in higher grades. Fairly priced in grades MS60 through MS65, and and reduction Meth. The P and D minted coins are about ten times rarer than the research to neat present. In MS67, the set is still a hallucination (when slabbed PIG TANACI

1951 BOOKER T. WASHINGTON SET The final year of striking, as sales were coming to a standstill. Philadelphia produced 510,082 pieces (for whatever reasons) while the other two mints created only 7,004 each. It is fairly priced (based on little demand) in grades MS60 through MS65. Due to excessive numismatic abuse, the higher mintage Philly striking is rarer than the two lower mintage D and S strikings! Few people seem to really care, right now. It is undervalued in MS66 condition with the Denver coin being approximately three times rarer than the East Coast striking, and some five times more difficult to locate than the West Coast creation. MS67 sets still must be labelled an illusion, since they currently do not exist (as slabbed by the major grading services). Unless buying for the pure joy of collecting, most future potential for the issues from 1948 through 1951 lies in the coins grading MS66 and higher.

1951 WASHINGTON-CARVER SET B.T.W.s not sold were melted by the Mint to create this new issue. Philadelphia coined 110,018 of the reincarnates, while the other mints each produced 10,004 specimens. (Most collectors rate the Oregon Trail as the best designed Commemorative half-dollar, while rating the Washington-Carver as the worst - followed by the Rhode Island and Monroe issues!) Due to a lack of interest, we can say it is fairly valued in MS60 through MS63 condition (\$65-\$70 Bid). At \$85 Bid in MS64, it is certainly underpriced; ditto for the MS65 coinage. Tough to locate the highermintage Philadelphia striking in this category. Rare when accurately graded in MS66. The Denver coin is a good Half to own, but to date, none have been graded MS66 - nor do any MS67 sets exist. A common coin up to MS65 condition, the San Francisco specimen is rare in the other grades. Fantastic future potential here, provided these dates do not become "Emperor Slabs." The latter is a term that I coined, based on the Grimm Brothers fairy tale in which the Emperor was told how beautiful his clothes looked · when he actually wore none! Hopefully, we will not see the above coins graded MS65 (when they actually grade MS64) or MS66 (when they actually grade MS65) just because the demand for the higher grades exists.

1952 WASHINGTON-CARVER SET Due to lack of demand for the issue, it is fairly priced in grades MS60 through MS64 (\$47-\$120 Bid). 1952-P circulated specimens are around by the proverbial ton. Key to the set in MS65 condition is the Denver striking. Excellent potential here. None have so far been graded MS67, while only twelve pieces were graded MS66. Fifty from Philadelphia have been granted MS66 status. In MS67 condition, only one San Francisco coin has been so honored.

t953 WASHINGTON-CARVER SET Always considered and still the rarest of the series, this 3-piece group is fairly priced in the MS60 through MS64 status (\$67-\$135) Bid). It is underpriced in MS65 condition. The P and D mint strikings are almost four times as rare as the West Coast creation in MS65. No complete sets have been graded MS66 or MS67. In fact, no Denver Commem exists above the MS65 level as of this writing. Great future for these sleepers

1954 WASHINGTON CARVER SET This year was the last for the production ot our older' United States Commemorative Coinage. Its resurrection would have to wait until 1982 (when we were offered the "Modern" 250th anniversary of the Birth of George Washington commemorative Proof and Non-Proof half-dollars) The '54 W.C. set is fairly priced in grades MS60 through MS64 (\$47-\$75 Bid) and undervalued in MS65 (\$600). Denver issue is the key rarity within the set and is about twice as rare as the mother mint creation. The San Francisco coin is common. In the upper grades, the coins are virtually nonexistent. Properly graded, such coins - should they make a future appearance - have to be labeled certain winners.

1936 WISCONSIN (25,015) Little price spread exists between specimens grading XF-AU and MS65 (\$165-\$229 Bid). Seems that masses of these badgers left their habitat to pay our numismatic world a visit. Fairly priced in the noted grades. Issue is certainly abundant. Census figures in MS66 and MS67 are also high; the grade appears to have been protected from abuse by the guardian angels. Suggest acquisition only for the pure joy of collecting. Nonetheless, when the next bull market arrives, promotion and hype (based on past dollar highs) will make values rise once again. That will be your

1936 YORK (25,015) The planet Venus is referred to as the Earth's sister planet simply because it is almost identical in size. Ponder this comparison with the Wisconsin half-dollar: Its mintage is identical, little price spread exists between grades XF-AU and MS65 (\$140-\$225 Bid), values are fair and census figures for MS66 and MS67 specimens are too high. Another issue which should be added to one's collection only for the pleasure of ownership. As noted with the Wisconsin, values will rise when the bull arrives, as he advances, prepare to market your York. You can be certain the unscrupulous telemarketers, etc. will be working overtime, informing all who will listen about the two-to-three hundred percent profit - or more - which could so easily be obtained if only one follows their advice. Needless to say, such material is usually so overpriced that little to no profit will ever be gained by the uneducated buyer Remember, knowledge is power only when you use it.

# Dealers: The Check Is In the Mail

(so it's time for you to check your address and telephone numbers)

Last week, the CDN mailed the confirmation cards for the 1992 Numismatic Dealer Directory; if you haven't received yours yet, you need to act quickly. The card contains names and addresses which need to be confirmed for proper inclusion in the *FREE LISTINGS* section of the 1992 Numismatic Dealer Directory. Many telephone area codes have changed this year, so it is especially important to make sure that it is easy for new customers to find you.

If you haven't received your card yet, please fill in the card below and return it as soon as possible to the NDD address listed - - and make sure you ask about our fabulous new advertising rates for the 1992 NDD.

Please return this card.  Verify that all corrections or	THIS IS YOUR FREE LI	STING FOR THE 1992
changes have been made legibly.	NUMISMAT	IC DEALER
